

# **Mid Sussex District Plan 2014 – 2031**

## **Consultation Draft**

November 2014

## List of Policies

Policy DP1: Sustainable Development in Mid Sussex.....	19
Policy DP2: Sustainable Economic Development.....	20
Policy DP3: Town Centre Development.....	22
Policy DP4: Village and Neighbourhood Centre Development.....	24
Policy DP5: Housing.....	25
Policy DP6: General Principles for Strategic Development at Burgess Hill .....	26
Policy DP7: Strategic Allocation to the east of Burgess Hill at Kings Way.....	28
Policy DP8: Strategic Allocation to the north and north-west of Burgess Hill.....	31
Policy DP9: Protection and Enhancement of Countryside .....	35
Policy DP10: Preventing Coalescence .....	36
Policy DP11: Sustainable Rural Development and the Rural Economy .....	37
Policy DP12: New Homes in the Countryside .....	38
Policy DP13: High Weald Area of Outstanding Natural Beauty.....	40
Policy DP14: Ashdown Forest Special Area of Conservation and Special Protection Area.....	40
Policy DP15: Setting of the South Downs National Park.....	42
Policy DP16: Sustainable Tourism.....	43
Policy DP17: Securing Infrastructure .....	44
Policy DP18: Transport.....	45
Policy DP19: Rights of Way and other Recreational Routes .....	46
Policy DP20: Communication Infrastructure .....	47
Policy DP21: Leisure and Cultural Facilities and Activities.....	48
Policy DP22: Community Facilities and Local Services .....	49
Policy DP23: Character and Design .....	50
Policy DP24: Dwelling Space Standards .....	51
Policy DP25: Accessibility .....	52
Policy DP26: Noise, Air and Light Pollution .....	53
Policy DP27: Housing Mix .....	54
Policy DP28: Affordable Housing.....	55
Policy DP29: Rural Exception Sites .....	56
Policy DP30: Gypsies, Travellers and Travelling Showpeople.....	57
Policy DP31: Listed Buildings and Other Buildings of Merit .....	59
Policy DP32: Conservation Areas.....	60
Policy DP33: Historic Parks and Gardens.....	61
Policy DP34: Archaeological Sites.....	61

Policy DP35: Trees, Woodland and Hedgerows .....	62
Policy DP36: Biodiversity.....	63
Policy DP37: Green Infrastructure .....	64
Policy DP38: Sustainable Design and Construction.....	65
Policy DP39: Renewable Energy Schemes .....	67
Policy DP40: Flood Risk and Drainage.....	67
Policy DP41: Water Infrastructure and the Water Environment.....	69
Local Plan policies that will continue to be saved on adoption of the District Plan .....	85

## List of Figures

Figure 1: Main destinations of Mid Sussex residents commuting to jobs outside the district .....	5
Figure 2: Main locations of non-residents commuting to jobs inside Mid Sussex .....	5
Figure 3: Mid Sussex Economic Context .....	11
Figure 4: Mid Sussex Environmental Constraints .....	12
Figure 5: Land at Kings Way, Burgess Hill.....	30
Figure 6: Strategic allocation to the north and north-west of Burgess Hill (Policy DP8).....	34

## Chapter 1: Background

- 1.1 This District Plan has been prepared in the context of the Localism Act and the National Planning Policy Framework. It reflects the aspirations of Central Government to give local people more ownership and control over the planning of their area so that development is seen as a positive thing that can help communities maintain a high quality of life, increase economic prosperity and protect the environment to meet current needs and the needs of future generations.
- 1.2 The Plan sets out a vision for how Mid Sussex wants to evolve and a delivery strategy for how that will be achieved. It supports the National Planning Policy Framework's 'presumption in favour of sustainable development'. As such, it sets out broad guidance on the distribution and quality of development in the form of 'higher level' strategic policies. It also provides the framework for all subsequent planning documents, including Neighbourhood Plans. The District Plan covers the period up to 2031 and will replace the majority of the Mid Sussex Local Plan adopted in 2004. The Local Plan policies that will continue to apply are listed in Appendix B.
- 1.3 Mid Sussex is fully covered by Town and Parish Councils, and a particular feature of the Plan is the desire of the District Council to involve Town and Parish Councils in its preparation and delivery. It is vital that there is local influence over where and what development happens, and the infrastructure that is provided over the next 16 years. The Plan encourages all Town and Parish Councils, individually or working together in clusters, to prepare and keep up-to-date local Neighbourhood Plans as envisaged in the Localism Act and the National Planning Policy Framework. These Neighbourhood Plans will need to be in conformity with the District Plan and national policy guidance. Town and Parish Councils have commenced work on the preparation of their Neighbourhood Plans, with 20 Neighbourhood Plan Areas designated by the District Council.
- 1.4 The Plan is informed by the discussions the District Council has had with neighbouring authorities regarding their needs and planning issues of cross-boundary importance in line with the 'duty to co-operate' requirements in the National Planning Policy Framework.
- 1.5 The Plan should be read in conjunction with the Sustainability Appraisal report. This shows which options have been considered for the strategy and policies, assessed against sustainability objectives, and explains why the options chosen are preferred over those rejected.
- 1.6 A Habitats Regulations Assessment has been prepared to identify the Plan's potential impacts on the Ashdown Forest, a European designated site, as the Council is required to do. A Policies Map also accompanies the Plan. The documents that comprise the evidence base are listed in Appendix A.
- 1.7 Finally, the Plan has been prepared on the principle that further housing development must be accompanied by suitable and timely infrastructure investment. To this end, the District Council will publish a Community Infrastructure Levy Charging Schedule and Infrastructure Development Plan (IDP) that will complement this Plan. The Charging Schedule and other sources identified in the IDP will be a mechanism for delivering the necessary infrastructure to accompany new development.

## Chapter 2: Vision and Objectives

### Mid Sussex – An Attractive Place to Live, Work and Visit

- 2.1. Mid Sussex is a rural District in the South East of England. It is a desirable place to live, benefiting from a high standard of living and a superb and easily accessible natural setting. The District is consistently ranked highly on quality of life measures. The most recent Halifax Quality of Life Survey of 2013, (which ranks how good an area is in which to live based on measures such as housing, environment, health and education), places Mid Sussex 17<sup>th</sup> out of 408 local authority areas in the country. Mid Sussex scored more highly than any other area in Sussex. It is also one of the least deprived areas in the country according to the Index of Multiple Deprivation (ranked 315 out of 326 in 2010); crime levels are low; health levels are generally good; and there is a strong sense of community.
- 2.2. The District has three towns - Burgess Hill, East Grinstead and Haywards Heath - and a good mix of large and smaller villages/hamlets. These are distinct communities with their own heritage, characteristics and aspirations for the future. According to the 2011 Census, the District is home to 139,860 residents – 62% of these live in the three towns, with the remaining 38% living in the villages. The District has a higher than average number of retired residents (aged over 65) – 18.1% compared to 17.1% for the South East, and 16.4% nationally.
- 2.3. Mid Sussex is set in beautiful countryside. Nearly 50% of the District is within the High Weald Area of Outstanding Natural Beauty, and over 10% is within the South Downs National Park. Between them is an area of small-stream valleys and hedgerows within a gently rolling landscape known as the Low Weald. Mid Sussex is the tenth most wooded District in the South East and two-thirds of this woodland is classified as 'ancient'. It also has many sites valued for their biodiversity including Sites of Special Scientific Interest, Sites of Nature Conservation Importance, Local Nature Reserves and Biodiversity Opportunity Areas. The Ashdown Forest is within the neighbouring Wealden District Council area but, as a European designated Special Protection Area and Special Area of Conservation, its proximity to Mid Sussex means that a Habitats Regulations Assessment of the District Plan is required.
- 2.4. The District is rich in heritage, which contributes to the unique character and identity of Mid Sussex and attracts many visitors to the area. The heritage assets of the District include many Listed Buildings, and Conservation Areas, ranging from the historic town centre of East Grinstead through to parts of the smaller villages and settlements, and sites of archaeological interest, some of which are Scheduled Ancient Monuments. There are Registered Parks and Gardens of Special Historic Interest and a large number of unregistered Parks and Gardens which appear on West Sussex County Council's Sites and Monuments Record. The District also includes many other buildings which, whilst not statutorily listed, are of architectural merit or of local historic interest, making a valuable contribution to the character of the area. Unsurprisingly, the District's attractive natural environment and rich heritage makes it highly valued by its residents and a popular tourist destination.

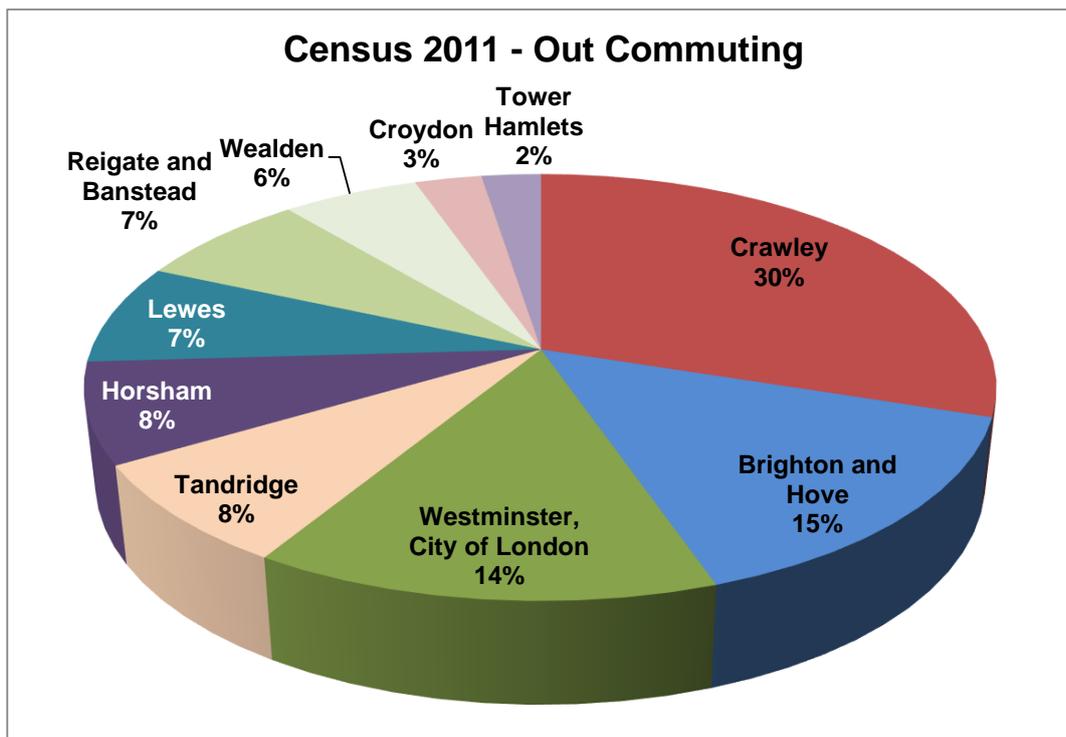

Figure 1: Main destinations of Mid Sussex residents commuting to jobs outside the district

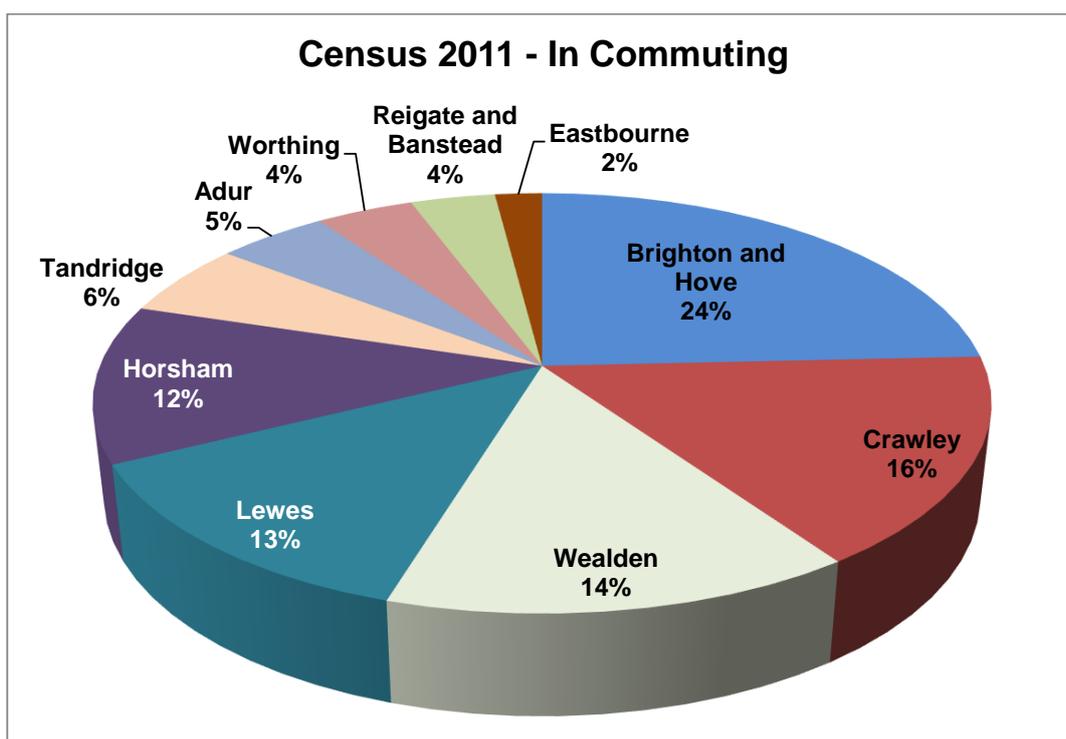

Figure 2: Main locations of non-residents commuting to jobs inside Mid Sussex

- 2.5. Economically, the District is generally successful with high levels of employment. The number of people economically active (i.e. people who are available to work) is over 75,000, which accounts for over 50% of the population of the District and remains at a higher percentage than the national figure. There are around 73,000 people in the District in employment. Over 13% of these work from home and 17% are self-employed. Around 44% of workers (31,745 as at 2011) commute out

of the District. In addition, over 20,000 people living outside the district commute in to Mid Sussex to work.

- 2.6. Mid Sussex District has a very low level of unemployment and these remains the lowest in the County. It has a relatively skilled and educated workforce and has access to higher educational establishments within the District (Central Sussex College) and two universities in Brighton (University of Brighton and University of Sussex).
- 2.7. In 2010, Mid Sussex was identified by Experian as the most economically resilient local authority area in the region. It is the location for a number of innovative and nationally known businesses with a third of businesses in the professional, scientific and technical, and information and communication sectors. There is a range of smaller businesses across sectors such as finance, service industries and light manufacturing. The Mid Sussex area has approximately 7,100 businesses. Over 85% of these employ fewer than 10 people with the majority employing fewer than four employees. Over 2,600 of these businesses have been operating for over 10 years; however, there is also a large number (nearly 1,000), which have only been running for two years or less. It is the only area in West Sussex to see a continued increase in new enterprises since 2008.
- 2.8. The nature of the local economy is strongly influenced by the wider regional context in which it sits. Mid Sussex is close to Crawley and London Gatwick Airport and within commuting distance of London and Brighton and the south coast. The District Council is an active partner in the Gatwick Diamond Initiative (an economic area centred upon the airport but covering nine local authority areas) and the larger 'Coast to Capital' Local Enterprise Partnership which stretches from Chichester in the west to Brighton in the south through to Croydon in the north. The District is well connected with good links by road and rail to London, Brighton and Gatwick and is within easy travelling distance of the Channel Tunnel, Southampton and Dover.

### **The Challenge Facing the District**

- 2.9. Whilst Mid Sussex generally offers a high quality of life, it will need to manage a series of issues over the lifetime of this Plan if the District is to continue to be economically successful and the negative impacts of development are to be properly mitigated. These issues include:
- Whilst the District is economically resilient, this cannot be taken for granted and there is a need to ensure the local economy is supported and businesses district-wide are able to thrive and grow in the future. In this regard, a survey conducted by the Burgess Hill Business Parks Association in September 2014<sup>1</sup> found that 74% of those businesses which had responded had grown in the previous 12 months whilst a significant number of businesses reported a need to move or expand their premises within the next 18 months;
  - Mid Sussex has a relatively high level of in and out commuting, which impacts on traffic levels and environmental quality. While it is recognised that commuters make a significant financial contribution to the District, it is important that appropriate employment opportunities are promoted within the District to ensure people who live locally have the opportunity to work locally;
  - There are already infrastructure deficits in sewerage and water supply, and open space and sports/play provision, and there are public concerns that further development will exacerbate these problems;

<sup>1</sup> Burgess Hill Business Parks Association Survey 2014

- Transport infrastructure is under particular strain with high levels of car ownership and car usage combining with narrow, winding rural roads and congested towns and major junctions. East Grinstead in particular has acknowledged congestion problems along the A22/A264;
- An important element of achieving sustainable communities is the regeneration and renewal of the three town centres so that they can be attractive and thriving retail, leisure and commercial hubs each with their own distinctive character;
- House prices in Mid Sussex are high relative to average incomes, and this causes affordability issues, particularly for young people;
- According to the 2011 Census, 18.1% of the Mid Sussex population are aged 65 and over, and the Office of National Statistics has projected that this will increase to 21.2% by 2021. There is also a projected increase in people aged over 85 years living in Mid Sussex from 2.8 % to 3.3 % by 2021;
- While overall the District is a generally affluent one, there are small areas where income levels are significantly lower and/or access to local community services is not as good and this can create social exclusion;
- There is a need to achieve sustainable, attractive and inclusive communities to ensure that the District continues to benefit from low crime levels, good health and an attractive natural and built environment; and,
- There is a need to promote development that is energy and resource efficient and increases the environmental as well as economic sustainability of communities within Mid Sussex, and its ability to adapt to climate change.

### **A Vision for Mid Sussex**

2.10. The Plan is based on the vision for the District set out in the 'Mid Sussex Sustainable Communities Strategy' (originally published in 2008 and refreshed in 2012):

*"A thriving and attractive District, a desirable place to live, work and visit. Our aim is to maintain, and where possible, improve the social, economic and environmental well-being of our District and the quality of life for all, now and in the future."*

2.11. The vision is underpinned by four priority themes that promote the development of sustainable communities:

- Protecting and enhancing the environment;
- Promoting economic vitality;
- Ensuring cohesive and safe communities; and,
- Supporting healthy lifestyles.

2.12. The Sustainable Communities Strategy was drawn up by the Mid Sussex Partnership, whose membership includes over 100 local organisations from the public, business and voluntary, and community sectors. A copy of the document can be found at [www.midsussex.gov.uk](http://www.midsussex.gov.uk).

### **Strategic Objectives for the District Plan**

2.13. The following table shows how the District Plan will take forward the above vision and apply it to planning issues.

Priority themes	Strategic Objectives for the District Plan
Protecting and enhancing the environment	<ol style="list-style-type: none"> <li>1. To promote development that makes the best use of resources and increases the sustainability of communities within Mid Sussex, and its ability to adapt to climate change</li> <li>2. To promote well located and designed development that reflects the District's distinctive towns and villages, retains their separate identity and character and prevents coalescence</li> <li>3. To protect valued landscapes for their visual, historical and biodiversity qualities</li> <li>4. To protect valued characteristics of the built environment for their historical and visual qualities</li> <li>5. To create and maintain easily accessible green infrastructure, green corridors and spaces around and within the towns and villages to act as wildlife corridors, sustainable transport links and leisure and recreational routes</li> <li>6. To ensure that development is accompanied by the necessary infrastructure in the right place at the right time that supports development and sustainable communities. This includes the provision of efficient and sustainable transport networks</li> </ol>
Promoting economic vitality	<ol style="list-style-type: none"> <li>7. To promote a place which is attractive to a full range of businesses, and where local enterprise thrives</li> <li>8. To provide opportunities for people to live and work within their communities, reducing the need for commuting</li> <li>9. To create and maintain town and village centres that are vibrant, attractive and successful and that meet the needs of the community</li> <li>10. To support a strong and diverse rural economy in the villages and the countryside</li> <li>11. To support and enhance the attractiveness of Mid Sussex as a visitor destination</li> </ol>
Ensuring cohesive and safe communities	<ol style="list-style-type: none"> <li>12. To support sustainable communities which are safe, healthy and inclusive</li> <li>13. To provide the amount and type of housing that meets the needs of all sectors of the community</li> <li>14. To create environments that are accessible to all members of the community</li> </ol>
Supporting healthy lifestyles	<ol style="list-style-type: none"> <li>15. To create places that encourage a healthy and enjoyable lifestyle by the provision of first class cultural and sporting facilities, informal leisure space and the opportunity to walk, cycle or ride to common destinations</li> </ol>

## Wider Context

- 2.14. The District Council has cooperated with neighbouring authorities on planning issues that cross administrative boundaries. Most of Mid Sussex lies within the Gatwick Diamond – an area centred upon the airport, which has a key role to play in the economic strength of the area, both as a direct employer and through its influence on the location of businesses that provide services to it or have international connections.
- 2.15. The Gatwick Diamond forms one of five sub-areas of the larger Coast to Capital Local Enterprise Partnership. The Coast to Capital mission is:
- “ to provide joint public and private sector leadership to drive sustainable private sector led growth and job creation across an area reaching from Brighton & Hove to Croydon and including the Gatwick Diamond and West Sussex. We will do this by boosting enterprise and embedding an even stronger enterprise culture. We will also increase international trade by helping current international traders to trade more and inspiring more businesses to trade internationally. In so doing we will realise every person and place’s potential.” (John Peel, Chairman of Coast to Capital).*
- 2.16. The Coast to Capital LEP is governed by a strategic Board, on which the Leader of Mid Sussex District Council represents the Gatwick Diamond district authorities, and a Joint Committee comprising all of the Leaders of the local authorities in the LEP area. It agreed a Strategic Economic Plan in March 2014, which resulted in a successful Growth Deal with Government.
- 2.17. The Gatwick Diamond has its own governance structure, with an Overview Forum of business and local authority Leaders, including the Leader of Mid Sussex District Council. The strategy set by the Overview Forum is implemented by the Management Board, which includes the Chief Executives of the six District/Borough Councils and two County Councils within the Gatwick Diamond. The strategic direction set by the Gatwick Diamond includes a local strategic statement, which is accompanied by a ‘memorandum of understanding’ setting out how the local authorities will work together to address the wider planning issues and to secure strategic infrastructure provision. This local strategic statement will be reviewed in 2014/15 to improve the clarity of the strategic priorities for growth and investment in the Diamond.
- 2.18. Within the Gatwick Diamond area, the three West Sussex local authority areas of Crawley, Horsham and Mid Sussex form the ‘Northern West Sussex’ area. The 2009 West Sussex Strategic Housing Market Assessment identified two distinct housing market areas in the County, the Northern West Sussex HMA and the Coastal HMA. The authorities in West Sussex have been working broadly within these two groupings and the Northern West Sussex authorities have collaborated on housing and economic evidence to inform their respective local plans. These authorities have detailed the outcomes of their joint working in the Northern West Sussex Position Statement (updated July 2014).
- 2.19. Whilst the strongest housing and economic links are between Mid Sussex, Horsham and Crawley, the southern part of Mid Sussex also has links with the Coastal area. The authorities in this area have formed a ‘Coastal Partnership’, which includes the other West Sussex authorities, the South Downs National Park Authority, Brighton & Hove City Council and Lewes District Council. The Coastal Partnership has also produced a local strategic statement, and Mid Sussex District Council has committed to participating in the review of this strategy in 2014/15. In October 2013 the Council also signed up to the Greater Brighton City Deal, which covers the administrative areas of Brighton & Hove, Lewes, Mid Sussex, Adur and Worthing Councils. The City Deal identifies a

number of growth areas, including support for the development of the proposed Business and Science Parks at Burgess Hill. The City Deal aims:

- “To build on the success of Brighton’s creative-tech cluster, and help its many small businesses translate their success onto a larger scale;
- To unlock growth across other areas of the City Region outside Brighton, by giving private sector investors the confidence and space they need to invest;
- To create effective governance structures for Greater Brighton, so that local authorities, businesses and universities across the City Region can work together in a seamless fashion”.

2.20. The complex economic context of the district is shown diagrammatically in Figure 3.

2.21. In the south of the District, part of Mid Sussex is within the South Downs National Park. The National Park Authority is a local planning authority, although it has a delegation agreement with the District Council to determine planning applications in the part of Mid Sussex which lies within the Park. Whilst the National Park Authority currently uses the Mid Sussex Local Plan policies to determine planning applications, it is producing its own Local Plan. Therefore, in agreement with the National Park Authority, the Mid Sussex District Plan area excludes the part of the District which lies within the National Park.

2.22. To the east of the District are the Ashdown Forest Special Protection Area and Special Area of Conservation (European designations). Whilst Ashdown Forest is outside Mid Sussex, its proximity means that a Habitats Regulations Assessment is required by legislation, and this must determine whether or not the Mid Sussex District Plan will adversely affect the integrity of the Forest. This mainly affects development proposals within 7km of the Forest boundary (which includes the settlements of East Grinstead, Ashurst Wood, Ardingly, Horsted Keynes and Crawley Down). Initial work has identified that potential impacts arise from recreational disturbance and atmospheric pollution. Potential mitigation measures have been identified and further work is taking place to assess the impact of this Plan. Mid Sussex District Council is working jointly with Wealden District Council, Lewes District Council, Tunbridge Wells Borough Council and Tandridge District Council to ensure that a consistent and robust approach to mitigation is adopted.

2.23. The environmental constraints of the district and the immediately surrounding area are shown in Figure 4.

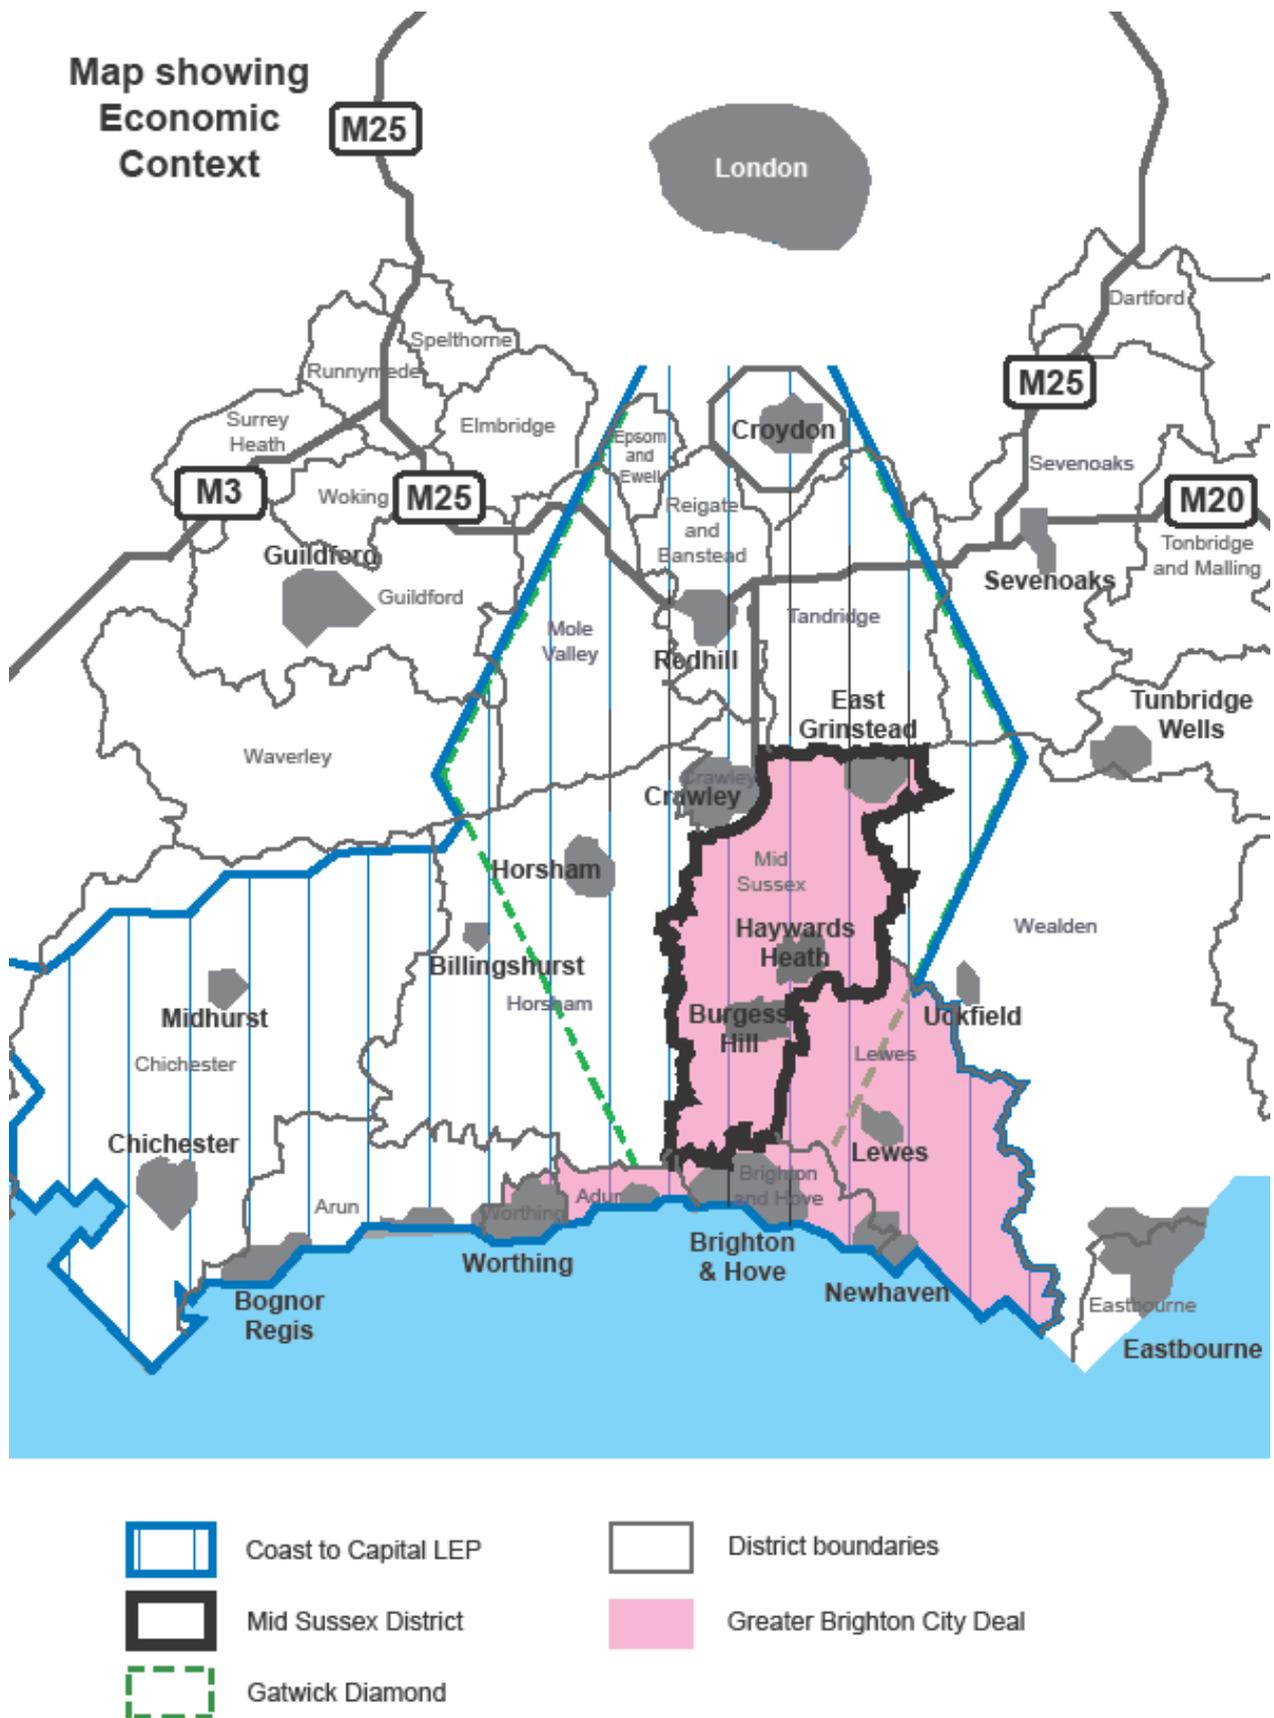

Figure 3: Mid Sussex Economic Context

## Chapter 3: Overall Strategy

### Introduction

- 3.1. This chapter sets out the overall strategy for achieving the vision and strategic objectives referred to in the previous chapter. It demonstrates how the Council will meet the challenge of balancing economic growth with protecting and enhancing the high quality environment of the District. It shows how it will meet the National Planning Policy Framework requirement to plan positively for sustainable development.
- 3.2. The District Plan provides clarity to communities, developers and other interested parties on what, where, when and how development should take place in Mid Sussex until 2031. In doing so, it shows how the Council will balance the need to protect the unique environment and heritage of the District with the equally important need to ensure that communities can be increasingly aspirational and promote local business activity and employment. However, the Plan is flexible enough to enable Neighbourhood Plans to reflect the individual characteristics and requirements of their localities. It enables those making planning decisions to respond to changing circumstances, and take advantage of any unforeseen opportunities to promote the vision and strategic objectives of the Plan.
- 3.3. The following chapter sets out the strategic policies that will guide the nature and quality of development in the District. These cover issues which apply to the whole District, or have implications beyond individual parish boundaries. Other town or village specific policies will come forward through Neighbourhood Plans. Neighbourhood Plans are required to be in general conformity with the policies of the District Plan.

### Protecting the Unique Character of Mid Sussex

- 3.4. Mid Sussex has a high quality environment that is greatly valued by those who live, work and visit the District. Its towns and villages include many historic buildings and conservation areas, and they are surrounded by attractive countryside, much of which is protected by national and local designations. The nature and quality of new development is therefore of the utmost importance to ensure that this environment is protected, and where possible enhanced.
- 3.5. Independent consultants were commissioned to undertake a study on the capacity of Mid Sussex to accommodate new development. The overall aim of the study was to provide a detailed and robust assessment of the constraints to development in the District in order to understand its capacity to accommodate development and to identify the most sustainable areas for development. The study was published in June 2014. Its key finding is that Mid Sussex is heavily constrained by environmental designations and by its attractive countryside and high quality landscape character in particular. The study highlights that almost two-thirds of the District is covered by primary level constraints, i.e. areas that are afforded the highest protection under national policy such as the National Park and Area of Outstanding Natural Beauty. In the remaining parts of the District, just 4% of the area is not covered by either one or more secondary constraints or is not already built upon. Secondary constraint areas are those which are sensitive to development pressures, but have less weight afforded to them by national policy.

### **Increasing the Sustainability of the District**

3.6. A central aim of the District Plan is to increase the sustainability of communities within Mid Sussex and reduce the need to travel to other areas for employment and other facilities. This gives people the opportunity to access jobs, shops and leisure facilities close to home and makes communities more sustainable by:

- Reducing the environmental impacts of increased traffic and congestion on air pollution and quality of life;
- Increasing the amount of time people spend within their communities so they can build stronger relationships with neighbours, leading to safer and more inclusive places and a greater sense of social responsibility;
- Supporting the local economy because people who live and work within the community are more likely to spend money in local shops and businesses, build local supply chains and thereby reduce leakage of expenditure outside of the area.

### **Supporting Economic Growth**

3.7. The Plan seeks to support sustainable communities and a robust local economy by encouraging opportunities for residents to work within their towns and villages and access other necessary services and facilities close to home. The Plan aims to support an annual economic growth rate over its lifetime of 3% and has strong links with the Council's Economic Development Strategy which was updated in 2013. This sets out the actions being undertaken by the Council to support the local economy. These include facilitating the delivery of new business space; supporting the regeneration of the three town centres; and direct support to businesses through specific Council services.

3.8. The location of Mid Sussex within the Gatwick Diamond brings potential to enhance the economic prosperity of the area, and it is important that Mid Sussex benefits fully from those opportunities. The Plan promotes strategic development at Burgess Hill, referred to below, and includes proposals for high quality employment floorspace to enable the towns of Mid Sussex to become more sustainable and to boost the economy of the area generally. There is a clear commitment from developers to bring forward the site for business use. The wider benefits of these developments will support high end economic and business growth across the Coast to Capital and South East LEP areas.

3.9. It is also important that economic development opportunities are taken up elsewhere in the District, particularly through the regeneration of town centres and other existing employment areas, and the development of new employment areas in the towns and villages. In developing their Neighbourhood Plans, Town and Parish Councils are being encouraged to take full account of the economic needs of their area, and to seek to reduce commuting by providing for these needs. The Plan also includes policies to support existing businesses and allow them to grow. In addition, it encourages inward investment especially by knowledge-driven, creative or high technology industries. This reflects the Council's Economic Development Strategy.

### **Meeting Local Housing Need**

3.10. Another central aim of the Plan is to ensure local housing needs can be met up to 2031. The Mid Sussex Housing and Economic Development Needs Assessment provides the evidence for the quantity of housing development required in Mid Sussex.

- 3.11. The National Planning Policy Framework requires authorities to demonstrate that they are meeting the 'full objectively assessed' housing needs of their area (paragraph 47). The level of housing that would be required if births, deaths and migration followed recent trends amounts to an annual requirement of 516 homes or 8,800 over the lifetime of the Plan. Delivery of this number of homes would also facilitate a 3% increase in economic growth each year, which would reflect the needs and aspirations of Mid Sussex, and would be realistic based on the level of growth achieved in the region before the national recession, and some increase in the proportion of the population who are not economically active due to the national trend of an ageing population. This is consistent with the positive policies within the Plan that support the potential for economic growth in the District. It will provide the opportunity for more residents to work in Mid Sussex so that fewer people need to commute to jobs outside the District.
- 3.12. The District Council is also required to provide a housing provision number up to 2031. However, the Council is not yet in a position to confirm its housing provision figure as this relies on the supply of housing land and consideration of any unmet need from neighbouring authorities. Both these aspects are work in progress. The Council is clarifying its potential supply of housing land and working with neighbouring authorities to gain a clear picture of any unmet development needs. Once this work is complete, the Council will include a housing provision figure in its pre-submission version of the Plan.

### **Ensuring Housing Development is in Suitable Locations**

- 3.13. The Sustainability Appraisal report for the District Plan demonstrates that the most sustainable strategy for the District is to allocate a significant proportion of the proposed development to Burgess Hill. Located in the south of the District, Burgess Hill is the largest of the three towns in Mid Sussex with a population of around 29,000. There are two main line stations which allow access to London and Brighton, town centre facilities and existing employment opportunities. Burgess Hill has fewer constraints than Haywards Heath and East Grinstead and other potential locations identified in the Sustainability Appraisal. The remainder of development will be delivered by the other towns and villages to support their economic, infrastructure and social needs.
- 3.14. Locating homes and employment opportunities as part of development at Burgess Hill will bring improvements in infrastructure and contribute to the renewal and regeneration of the town centre. Over the last five years, work has been progressing in Burgess Hill on a proposal to develop between 3,500-4,000 new homes to the north and the east of the town, new high quality employment development, new sporting facilities and other infrastructure benefits. This work has been led by Burgess Hill Town Council, in consultation with adjacent Parish Councils (Ansty and Staplefield Parish Council and Hurstpierpoint & Sayers Common Parish Council), the District Council and West Sussex County Council, and interested developers. This work has been the subject of public consultation, and the results incorporated into the Burgess Hill Town Wide Strategy. The Town Wide Strategy was adopted by the Town Council in 2011.
- 3.15. The District Council supports this work, which is seen as a leading example of the 'bottom-up' approach to planning now being promoted through the Localism Act and National Planning Policy Framework (paragraphs 183-185). It reflects the Council's aspirations to support sustainable growth where this is accompanied by infrastructure benefits. The principles and development proposals set out in the Burgess Hill Town Wide Strategy are included as strategic development locations in this Plan.

## Supporting Neighbourhood Plans

- 3.16. The District Council's preference is that the location and nature of additional development be identified through Neighbourhood Plans. This reflects the Government's localism agenda, and its view that giving power and responsibility to local communities will give them the confidence to accept appropriate development and the corresponding benefits that can come with it. This view is confirmed in the National Planning Policy Framework (paragraph 16), which sets out that neighbourhoods should "develop plans that support the strategic development set out in Local Plans... and plan positively to support local development".
- 3.17. Most of the District's Town and Parish Councils have commenced preparation of their Neighbourhood Plans and are working through the statutory processes to get their plans in place. 20 Neighbourhood Plan Areas have been designated across the District providing almost full coverage (outside of the National Park area). This includes the three towns of Burgess Hill, East Grinstead and Haywards Heath.
- 3.18. The Town and Parish Councils are shaping sustainable neighbourhoods with their communities by allocating land for a variety of uses including housing, business and Local Green Spaces that reflect distinct local character, needs and aspirations.

## Ensuring Housing Delivery

- 3.19. The identification in the District Plan of where new homes will be delivered (and the subsequent detailed allocations and policies in Neighbourhood Plans) is essential to demonstrate delivery of the new homes that Mid Sussex requires for its communities to become more sustainable and meet their needs. This will then protect the District from other development proposals outside of the areas identified in the District Plan and Neighbourhood Plans; ensure the Plan has local community support; and that the overall aims of the District Plan are not undermined.
- 3.20. Despite recent national economic difficulties, Mid Sussex has continued to receive development proposals and has permitted a significant number of planning applications. As at July 2014, there were approximately 3,100 new homes already 'committed' on sites that are allocated either in the Mid Sussex Local Plan or the Small Scale Housing Allocations Document, or have been granted planning permission, but not yet implemented.
- 3.21. The national economic situation had an impact on housing delivery, but there are local factors in some cases that have prevented some sites from being delivered. These range from landowner disputes, to viability issues, and delays in providing necessary infrastructure. The District Council will continue to work with the landowners, developers and statutory agencies to try and remove these barriers. Progress on these matters will be reflected in the Council's updates of its five-year housing land supply position.
- 3.22. The delivery of the Burgess Hill Town Wide Strategy is being progressed by a Development Board comprising representatives from the Town, District and County Councils. Mechanisms for delivery include Planning Performance Agreements, one of which was signed for the strategic allocation to the east of Burgess Hill and the Council has granted planning permission for 480 homes on this site. A Planning Performance Agreement has been drafted for the remainder of the strategic development, and an outline planning application is expected to be submitted before the end of 2014. The Plan assumes the strategic developments proposed for around Burgess Hill will yield 3,865 homes over the lifetime of the Plan.

- 3.23. The remaining new homes are proposed to be delivered through the Neighbourhood Planning process for the District. This Plan recognises any housing provision figure will be a floor (minimum) rather than a ceiling (maximum) figure. If communities wish to promote more development through their Neighbourhood Plans to achieve additional local infrastructure improvements then the District Plan will not prevent this, provided the proposed developments meet with the vision, strategic objectives and policies of this Plan and the requirements of the National Planning Policy Framework.
- 3.24. The Plan recognises that if insufficient development is being delivered through Neighbourhood Plans, then the District Council will be required to produce its own housing allocations document for the District. Such a document has been programmed into the Local Development Scheme to ensure its swift implementation if it proves necessary to maintain a five-year supply of housing land.
- 3.25. The Plan also acknowledges that the level of housing and other development will need to be spread over the Plan period rather than it all coming at the beginning or end. However, it is accepted the timing of developments coming forward is partly in the hands of the specific developers themselves and will depend on the timely delivery of infrastructure.

### **Meeting Local Infrastructure Needs**

- 3.26. The Mid Sussex Community Infrastructure Levy Charging Schedule will be the main mechanism for delivering the necessary infrastructure to accompany new development. This will be supplemented with negotiated section 106 agreements to secure affordable housing and additional on-site infrastructure, and section 278 agreements to secure site-specific highway works.
- 3.27. An Infrastructure Development Plan has been prepared which identifies all types of infrastructure needed to support the planned amount of new homes and businesses' economic growth in the District over the next 16 years. It has been prepared in collaboration with the County Council, Town and Parish Councils and other infrastructure providers to reflect the holistic needs of the District. The Infrastructure Development Plan sets out the estimated costs, who is responsible for infrastructure provision and when it should be provided.
- 3.28. In January 2013, the Government announced that Town and Parish Councils that take a proactive approach, by drawing up Neighbourhood Plans that are endorsed by local people in a referendum, will receive 25% of the revenues from the Community Infrastructure Levy arising from the development that they choose to accept. In areas not covered by an agreed Neighbourhood Plan, the Town or Parish Council will receive up to 15% of the Community Infrastructure Levy, capped at £100 per dwelling in the parish at the time the Levy is collected. The District Plan goes further than this, and proposes that the Community Infrastructure Levy collected from developers by the District Council will normally be spent on infrastructure needs in the locality of the scheme that generated it. The prospect of seeing real infrastructure improvements and other benefits to their area as a result of new development has been key to encouraging Mid Sussex communities to take a positive approach to planning for growth. It is therefore vital that County, District and Town and Parish Councils work together effectively to secure the right infrastructure at the right time to accompany new development.

## Gatwick Airport

- 3.29. Gatwick Airport is a single runway, two terminal airport just to the north-west of the District. The airport has ambitious plans for growth and development, utilising the existing runway and terminals, to support up to 45 million passengers by 2021. The Council will work with partners across the Gatwick Diamond area, through the Gatwick Diamond Initiative, to encourage sustainable economic growth to support this expansion. This will include supporting Gatwick as an economic and transport hub, and seeking to improve access to and from the airport by a range of modes of transport.
- 3.30. The Council will also work with adjoining local authorities to minimise the environmental impact of existing development at the airport and actively seek to ensure that the environmental effects of expansion proposals (within agreed limits) are minimised, and where necessary mitigated, and that wherever possible additional environmental benefits are secured.
- 3.31. The airport has submitted proposals for an additional parallel runway to the Airports Commission, which is due to submit a final report to the Government by summer 2015 assessing the environmental, economic and social costs and benefits of various solutions to increase airport capacity, considering operational, commercial and technical viability.
- 3.32. The District Plan is based upon the airport functioning within the legal limits defined by the Gatwick Airport legal agreement (that is, without additional runway development before 2019). Any growth of the airport beyond that allowed in the legal agreement would require an early review of the policies in the Plan and – given the possible impact on the District - potentially the overall strategy.

## Chapter 4: Policies

### Sustainable Development

#### Policy DP1: Sustainable Development in Mid Sussex

Policy DP1 promotes economic, social and environmental gains through development based on the aims of the Mid Sussex Partnership's Sustainable Communities Strategy (2008-2018). These cannot be achieved in isolation because they are mutually dependent. People who live and work within the community are more likely to spend money in local shops and businesses and build local supply chains. Improving sustainable transport choices can have a positive impact on quality of life, public health, minimising the impacts of climate change, reducing congestion and enhancing people's spending power. Opportunities to build safe and socially inclusive places can improve community cohesion and quality of life.

The District Plan seeks to achieve sustainable development in accordance with paragraph 10 of the National Planning Policy Framework, which requires Plans to take local circumstances in account so that they respond to the opportunities for achieving sustainable development.

#### DP1: Sustainable Development in Mid Sussex

*Strategic Objectives: 4) To improve access to retail and community facilities, 5) To create safe and crime resistant communities, and encourage social cohesion, 7) To improve efficiency in land use through the re-use of previously developed land and existing buildings, including re-use of materials from buildings, and encourage urban renaissance, 11) To reduce road congestion and pollution levels by improving travel choice, and reducing the need for travel by car, thereby reducing the level of greenhouse gases from private cars and their impact on climate change and 16) To ensure high and stable levels of employment so everyone can benefit from the economic growth of the District.*

*Evidence Base: Mid Sussex Sustainable Communities Strategy 2008-2018.*

When considering planning applications, the Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the National Planning Policy Framework (paragraphs 14 and 15). In Mid Sussex, sustainable development means that which:

- creates jobs in towns and villages, reduces the need to travel to other areas for employment and gives people the opportunity to access jobs, shops and leisure facilities close to home;
- maximises the use of previously developed land and buildings within the built-up areas and reduces the environmental impacts of development;
- increases the opportunity for people to spend more time within their communities so they can build stronger relationships with neighbours, leading

to safe and socially inclusive places with a greater sense of social responsibility;

- increases opportunities to walk, cycle or use public transport, including as part of the green infrastructure network;
- reflects the need to adapt to the impacts of climate change;
- improves quality of life and the conditions in which people live, work, travel and take leisure;
- contributes to the creation of balanced communities that meet the needs of all residents with appropriate infrastructure and public facilities that are accessible to all; and
- supports the local economy.

## Quantity and Type of Development

### Policy DP2: Sustainable Economic Development

The District Plan strategy is based on the Council's aspiration for sustainable economic growth. This aspiration will contribute towards enhancing the prosperity of the Gatwick Diamond and Greater Brighton City Region, providing the opportunity for the residents of Mid Sussex to work locally and reduce the need to commute. The joint Economic Growth Assessment (2014) highlights a high degree of economic inter-relationship between Crawley, Horsham and Mid Sussex. Overall economic strength is dependent on ongoing and continued joint-working and effective management of strategic issues across the economic sub-region, particularly with those authorities whose economies are critically interrelated to Mid Sussex. The Council will continue to support the Mid Sussex economy and wider economic sub-region in collaboration with other local authorities and alongside the work of the Coast to Capital Local Enterprise Partnership over the Plan period.

The District Plan reflects the requirements of the National Planning Policy Framework paragraph 21, by setting out a clear economic vision and strategy, identifying strategic sites and criteria for supporting inward investment and existing businesses. Policy DP2 encourages new businesses to the District in order to meet aspirations for economic growth and the wider benefits this would bring.

The Mid Sussex Economic Development Strategy (2013) supports the delivery of Policy DP2 in a number of ways; by supporting the economy through facilitating new development, delivering starter units and the revitalisation of the town centres. It enables business growth and resilience through delivering key services, procuring locally and paying invoices quickly. There will be support through the Gatwick Diamond Initiative and working with other partners including the County Council on specific initiatives.

The Economic Growth Assessment (2014) indicates a need for additional employment land in the sub-region to maintain a high quality and competitive business offer. It is important that the District Plan allows for economic development opportunities that arise within the District, particularly for high quality, knowledge based or high-tech industries which the Economic Development Strategy recognises as a viable market for the District.

Coast to Capital Local Enterprise Partnership has identified Burgess Hill as a spatial priority in its Strategic Economic Plan (SEP) (2014). The spatial priorities in the SEP are defined as those locations with the most current growth or where there are opportunities to create the most capacity for future growth. Coast to Capital have committed to making significant investment in the Burgess Hill area between 2015/16 and 2020/21 to deliver new jobs, homes and employment space.

The Burgess Hill Employment Site Study (2012) assessed the deliverability of the business park at Burgess Hill. This study sets out scenarios for job targets and commensurate floorspace provision for business park developments. Although market conditions in the short to medium term will affect the viability and deliverability of the business park; by putting in place other measures, through the Council's Economic Development Strategy, such as encouraging inward investment, development is expected to take place over the longer term. Policy DP2 takes account of the conclusions of the study by proposing an allocation of between 20 to 30 hectares between Burgess Hill and the Cuckfield Road.

The Coast to Capital Strategic Economic Plan (2014) supports the business park proposal and proposals by the University of Brighton for a high quality Science and Technology Park, creating 100,000m<sup>2</sup> of employment floorspace and 2,500 new jobs (around 50% of which would be for new graduates. The Strategic Economic Plan (page 50) states that provision of these developments "will create more sustainable communities within Mid Sussex by improving job prospects within the District and reducing the need for commuting".

Paragraph 22 of the National Planning Policy Framework states that planning policies should avoid the long term protection of sites allocated for employment uses, so Policy DP2 also sets out the circumstances in which changes of use could take place.

#### **DP2: Sustainable Economic Development**

*Strategic Objectives: 7) To promote a place which is attractive to a full range of business, and where local enterprise thrives; 8) To provide opportunities for people to live and work within their communities, reducing the need for commuting.*

*Evidence Base: Burgess Hill Employment Site Study; Coast to Capital Strategic Economic Plan, Employment Land Review; Mid Sussex Economic Development Strategy, Northern West Sussex Economic Growth Assessment.*

**To achieve the required level of economic growth the total number of additional jobs required within the district over the plan period is estimated to be 7,600 jobs. This will be achieved by:**

- **Encouraging high quality development of land and premises to meet the needs of 21<sup>st</sup> century businesses;**
- **Supporting existing businesses, and allowing them room to expand;**
- **Encouraging inward investment, especially the location, promotion and expansion of clusters or networks of knowledge, creative or high technology industries;**
- **Seeking the provision of appropriate infrastructure to support business growth – in particular high speed broadband connections.**

**New employment land and premises:**

- **Allocating 20 – 30 hectares of land as a high quality business park at Burgess Hill to the east of Cuckfield Road;**
- **Incorporating employment provision within large scale housing development as part of a mixed use development where it is appropriate; and**
- **Allowing new small-scale economic development, in the countryside, including tourism (in**

accordance with Development in the Countryside policies).

Some interest has been expressed in developing a science park to the west of Cuckfield Road, to support research and development and provide employment for the wider area. This broad location is indicated on the Policies Map. The Council would consider any such proposals taking into account:

- how the proposal would contribute to meeting the overall objectives of this policy;
- how the proposal would secure the objectives of policy DP18 Transport, particularly in terms of delivering sustainable transport;
- the wider impact on the environment and the surrounding area.

Effective use of employment land and premises will be made by:

- Protecting allocated and existing employment land and premises (including tourism) unless it can be demonstrated that there is no reasonable prospect of its use or continued use for employment or it can be demonstrated that the loss of employment provision is outweighed by the benefits or relative need for the proposed alternative use;
- Permitting appropriate intensification, conversion, redevelopment and/ or extension for employment uses providing it is in accordance with other policies in the Plan;
- Giving priority to the re-use or adaptation of rural buildings for business or tourism use and to the diversification of activities on existing farm units (in accordance with Development in the Countryside policies);

Neighbourhood Plans should:

- Identify the needs of local businesses and their local residents for employment opportunities and any areas requiring economic regeneration, infrastructure provision or environmental enhancement as required by paragraph 21 of the National Planning Policy Framework; and
- Allocate sufficient land within their towns and villages to meet these needs.

If monitoring indicates that there is an insufficient supply of allocated employment sites to meet the District's jobs needs, then the council will consider allocating sites through a Site Allocations Development Plan Document, produced by the District Council.

### Policy DP3: Town Centre Development

The Council supports the regeneration and renewal of the three key town centres of Burgess Hill, East Grinstead and Haywards Heath. The town centres provide a range of shops and other facilities which play a key role in serving each town and the surrounding villages and rural areas.

The Mid Sussex District Council Retail Study (September 2008, updated October 2014) indicated that while the three towns are performing reasonably well as shopping destinations, they are not meeting their full potential, with a need to improve their attractiveness to minimise competition from other towns outside the District.

The Retail Study Update 2014 found that for convenience goods, there is no district-wide capacity for new retail floorspace until 2024 as the supermarket permitted as part of the Haywards Heath railway

station redevelopment will effectively 'soak up' any quantitative need for new retail floorspace over the short/medium term. Over the Plan period until 2031, the study found that there is a forecast capacity for 3,232m<sup>2</sup> net of new convenience goods floorspace, the majority of which should be directed towards Burgess Hill and East Grinstead.

For comparison goods, the study forecasts a quantitative need for new retail floorspace of 10,487m<sup>2</sup> net by 2031. This capacity is fairly evenly distributed between Haywards Heath (2,659m<sup>2</sup>), Burgess Hill (3,985m<sup>2</sup>) and East Grinstead (3,447m<sup>2</sup>). There is more limited capacity forecast for Hassocks, Hurstpierpoint and the district's other main village centres (395m<sup>2</sup>).

Because there are redevelopment schemes in the pipeline for all three of the town centres which are likely to more than 'mop up' the quantitative need for new floorspace by 2031, it is not considered necessary to include specific targets for retail floorspace within the policy.

Policy DP3 supports the regeneration of the town centres and seeks to maintain the overall objective of improving the services and attractiveness of the district's town centres by encouraging developments of mixed uses to meet the needs of the community.

Proposals for retail, leisure and office and other main town centre uses should be in a town centre location in accordance with the sequential test for town centre uses. Where planning applications are for main town centre uses proposed on the edge of town, outside the town centre or out of town and are not in accordance with the District Plan or Neighbourhood Plan, the Council will apply a sequential test and require an impact assessment as set out in the National Planning Policy Framework (paragraphs 24-27).

### **DP3: Town centre development**

*Strategic Objectives: 9) To create and maintain town and village centres that are vibrant, attractive and successful and that meet the needs of the community.*

*Evidence Base: Mid Sussex Retail Study Update 2014; Town Centre Masterplans and accompanying work.*

#### **Town Centres**

**These are defined as the town centres of Burgess Hill, East Grinstead and Haywards Heath which meet the needs of their communities and those of the surrounding large and small villages and countryside areas.**

**To support the regeneration and renewal and environmental enhancement of the town centres as defined on the Policies Map – development, including mixed use and tourism related development, will be permitted providing it:**

- **is appropriate in scale and function to its location including the character and amenities of the surrounding area;**
- **has regard to the relevant Town Centre Masterplans and is in accordance with the relevant Neighbourhood Plan.**

#### **Primary Shopping Frontages**

**Primary shopping frontages are areas considered to be the principal shopping areas, predominantly for retailing. Proposals should enhance the shopping facilities available and not undermine the retail function of the area. Within primary shopping frontages as defined on the Policies Map change of use will be permitted where:**

- **A clear predominance of Class A1 shop uses would be maintained;**
- **The nature of the proposed use would sustain and enhance the vitality and viability of the centre; and**

- The location and prominence of the proposed use would not lead to a significant break in the continuity of the shopping facilities.

Changes of use to B1a offices or residential use at ground floor level will be resisted.

### **Secondary Shopping Frontages**

Secondary shopping frontages are the smaller areas on the edge of, or beyond, the primary shopping frontages. A high proportion of Class A1 – A5 uses appropriate to a shopping area, which contribute to the pedestrian flow and attractiveness of the area, should be retained. Within secondary shopping frontages as defined on the Policies Map change of use will be permitted where:

- The proposal would sustain and enhance the vitality and viability of the shopping area;
- The cumulative effect of non-Class A1 – A5 shop uses is not so great as to undermine the attractiveness of the shopping area.

In exceptional circumstances change of use to B1a office, health or medical use or residential use, at ground floor level, will be permitted where:

- It can be shown that an A1 – A5 use is no longer viable;
- An unacceptable break in the frontage of A1 – A5 uses would not occur; and
- The cumulative effect of the proposal would not be so great as to undermine the vitality and viability of the shopping area.

### **Sequential Test for Town Centre Uses**

A sequential test must be applied to planning applications for main town centre uses that are not in an existing centre and are not in accordance with the District Plan and the relevant Neighbourhood Plan. The sequential test will require:

- Applications for main town centre uses to be located in town centres; or, if suitable sites are not available
- In edge of centre locations where the site is accessible and well connected to the town centre; or, if suitable sites are not available
- At accessible out of centre sites that are well connected to the town centre

Where an application fails to satisfy the sequential test, or fails to meet other requirements of this policy, it should be refused.

## **Policy DP4: Village and Neighbourhood Centre Development**

The Plan seeks to support for a prosperous rural economy in accordance with paragraph 28 of the National Planning Policy Framework.

The Mid Sussex Retail Study (2008) focused on the three town centres and the village centres of Hassocks and Hurstpierpoint (Chapter 8), indicating that the two village centres were performing well in their role. However, all the main village centres including Crawley Down, Cuckfield, Hassocks,

Hurstpierpoint and Lindfield have an important range of services and facilities that supply the day-to-day requirements of local residents, neighbouring small villages and the countryside areas surrounding the villages. People may have to travel further to gain access to some services that are not provided by these villages and it is important that these and other smaller centres remain vibrant and successful.

#### **DP4: Village and Neighbourhood Centre development**

*Strategic Objectives: 9) To create and maintain town and village centres that are vibrant, attractive and successful and that meet the needs of the community.*

*Evidence Base: Mid Sussex Retail Study; Town Centre Masterplans and accompanying work.*

##### **Village Centres**

**These are defined as the village centres of Crawley Down, Cuckfield, Hassocks, Hurstpierpoint and Lindfield which meet the needs of their own communities and neighbouring small villages and countryside areas.**

**To support the village centres, development, including for mixed uses, will be permitted providing it:**

- **helps maintain and develop the range of shops and services to enable the village centre to meet local needs; and**
- **is appropriate in scale and function to its location including the character and amenities of the surrounding area; and**
- **is in accordance with the relevant Neighbourhood Plan.**

##### **Small Village Centres, Neighbourhood Centres (in the towns)**

**These are defined as the various small village and neighbourhood shopping centres which meet the needs of their own communities and countryside areas. To support these, changes of use from Class A1 shop uses to other uses will be resisted.**

**In exceptional circumstances, a change of use to Class A2, A3, A4, A5 and B1a offices use, health or medical use will be permitted providing:**

- **it can be shown that the existing use is no longer viable; and**
- **is appropriate in scale and function to its location including the character and amenities of the surrounding area and will not give rise to increased problems of traffic generation and car parking; and**
- **is in accordance with the relevant Neighbourhood Plan.**

#### **Policy DP5: Housing**

The Council's proposed housing provision figure will be set out in this policy in the pre-submission of the Plan once ongoing work on the housing land supply and an assessment of the unmet development needs of neighbouring authorities has been completed.

## Policy DP6: General Principles for Strategic Development at Burgess Hill

The Burgess Hill Town Wide Strategy (2011) identifies a wide range of improvements that are required for Burgess Hill to become a fully sustainable, 21<sup>st</sup> century town focused around a high quality, vibrant and accessible town centre, supported by necessary community facilities, employment opportunities and access to green open space underpinned by a state of the art transport network and modern supporting infrastructure.

Coast to Capital Local Enterprise Partnership has identified Burgess Hill as a spatial priority in its Strategic Economic Plan (2014). The spatial priorities in the Plan are locations with the most current growth or where there are opportunities to create the most capacity for future growth. Coast to Capital have committed to investing in the Burgess Hill area between 2015/16 and 2020/21 to deliver new jobs, homes and employment space.

Mid Sussex District Council is a partner in the Greater Brighton City Deal. The City Deal document, agreed with Government and partners including the University of Brighton in March 2014, identifies Burgess Hill as a Growth Centre for a new Business and Science Park.

The general principles set out in this policy are primarily based on the vision and objectives of the Burgess Hill Town Wide Strategy. The objectives for the town are:

- A better town centre with a greater range of shops and a more attractive pedestrian environment;
- Improved public transport, walking, cycling links as well as better roads;
- New and improved community and cultural facilities;
- Additional high quality and suitably located business park development; and
- New, improved and well connected sports, recreation and open space in and around Burgess Hill (Town Wide Strategy page 16).

A number of potential infrastructure and other projects were set out in the Burgess Hill Town Wide Strategy and included town centre public realm enhancements, transport and public transport improvements, new sports, arts and community facilities. All proposals for strategic development will be required to meet the criteria set out below.

### DP6 : General Principles for Strategic Development at Burgess Hill

*Strategic Objectives: All.*

*Evidence Base: Burgess Hill: A Town Wide Strategy; Burgess Hill Employment Site Study; Burgess Hill Town Centre Masterplan; Burgess Hill: Visioning the Future; Feasibility Study for Development Options at Burgess Hill; Coast to Capital Strategic Economic Plan; Greater Brighton City Deal, Mid Sussex Landscape Capacity Study, Mid Sussex Transport Study.*

**All strategic development at Burgess Hill, as shown on the inset map, is required to support the general principles set out in this policy.**

**Strategic development will:**

- **Be designed in a way that integrates it into the existing town providing connectivity**

with all services and facilities;

- **Contribute towards a better, more accessible town centre with a greater range of shops, an expansion of retail floorspace, leisure uses and public realm improvements including a new public square;**
- **Provide additional, high quality employment opportunities including suitably located Business and Science Park developments;**
- **Improve public transport, walking and cycling infrastructure and access to Burgess Hill and Wivelsfield railway stations, including the provision of transport interchanges;**
- **Provide necessary transport improvements that take account of the wider impact of the development on the surrounding area;**
- **Provide highway improvements in and around Burgess Hill including addressing the limitations of east-west traffic movements across Burgess Hill and, where necessary, improvements across the highway authority boundary in East Sussex;**
- **Provide new and improved community, retail, cultural, educational, health, recreation, play and other facilities to create services and places that help to form strong local communities and encourage healthy lifestyles;**
- **Provide new and/or improved and well connected sports, recreation and open space in and around Burgess Hill, including the continuation of the existing 'Green Circle' of linked areas of informal open space around the town along with its associated network of multi-functional paths, the Green Circle network, and links into the town centre; (Note: 'multi-functional will generally mean able to be used by walkers, cyclists and horse-riders).**
- **Support the delivery of a multi-functional route between Burgess Hill and Haywards Heath;**
- **Provide a Centre for Community Sport in the vicinity of the Triangle Leisure Centre;**
- **Provide a range of housing including a minimum of 30% affordable housing, in accordance with policy DP28 Affordable Housing and housing for older people;**
- **Identify and respond to environmental, landscape and ecological constraints and deliver opportunities to enhance local biodiversity and contribute to the delivery of green infrastructure in and around the town in accordance with policies elsewhere in the Plan including DP36 Biodiversity and DP37 Green Infrastructure;**
- **Not be occupied until improvements at Goddards Green Waste Water Treatment Works and connecting pipework and pumping stations to increase the capacity and environmental quality are implemented;**
- **Wherever possible, incorporate on-site 'community energy systems', such as Combined Heat and Power, to meet energy needs and create a sustainable development.**

### **Policy DP7: Strategic Allocation to the east of Burgess Hill at Kings Way**

This site lies to the east of Kings Way and is a greenfield site between the railway running through Burgess Hill and Ditchling Common Site of Special Scientific Interest in East Sussex.

The Sustainability Appraisal for the District Plan assesses this site alongside other proposed alternatives for strategic development in Mid Sussex. Although concerns over landscape capacity were identified, it scores favourably overall. The Sustainability Appraisal concludes that the development principles ensure that infrastructure (community facilities, transport, water, etc.) are programmed and delivered alongside the development. The policy includes a specific requirement to protect, manage and enhance the Ditchling Common Site of Special Scientific Interest, which will have a positive impact on the sustainability objective concerned with conserving and enhancing biodiversity.

The Burgess Hill Town Wide Strategy (page 50), identified this site as a preferred location for housing development as a mixed use site for homes, with open space and community facilities amongst other requirements.

In May 2013 the Council granted planning permission for 480 new homes on this site. The application includes a neighbourhood centre, informal open space and measures to mitigate the impact on Ditchling Common Site of Special Scientific Interest.

#### **DP7: Strategic allocation to the east of Burgess Hill at Kings Way**

*Strategic Objectives: All.*

*Evidence Base: Burgess Hill: A Town Wide Strategy; Burgess Hill: Visioning the Future; Feasibility Study for Development Options at Burgess Hill; Coast to Capital Strategic Economic Plan; Mid Sussex Landscape Capacity Study.*

**Strategic development, as shown on the inset map, is allocated to the east of Burgess Hill at Kings Way for:**

- **Up to 480 new homes;**
- **High quality and accessible informal public open space;**
- **A local hub serving the site and the wider community;**

**In addition to conforming to the general principles in DP6, strategic development in this location will:**

- **Provide infrastructure, as set out in the Burgess Hill Town Wide Strategy and identified in technical assessments, implemented before or alongside development to an agreed programme of delivery. This will include financial contributions to the provision of education facilities for all ages;**
- **Address the limitations of east-west traffic movements across Burgess Hill;**
- **Implement long-term management of the Ditchling Common Site of Special Scientific Interest (SSSI) and protect and enhance this adjoining area from the impacts of strategic development (on site provision together with appropriate mitigation measures);**
- **Consider the close proximity of the South Downs National Park and the Keymer Tile Works**

**Site of Nature Conservation Importance (SNCI), and the opportunities with the latter site for the joint development of community infrastructure for the east side of Burgess Hill;**

- **Consider other developments in the vicinity to ensure complementary provision of infrastructure and facilities;**
- **Provide additional informal open space on site; and**
- **Avoid unnecessary damage to the characteristic field pattern and historic hedgerow and tree lines.**

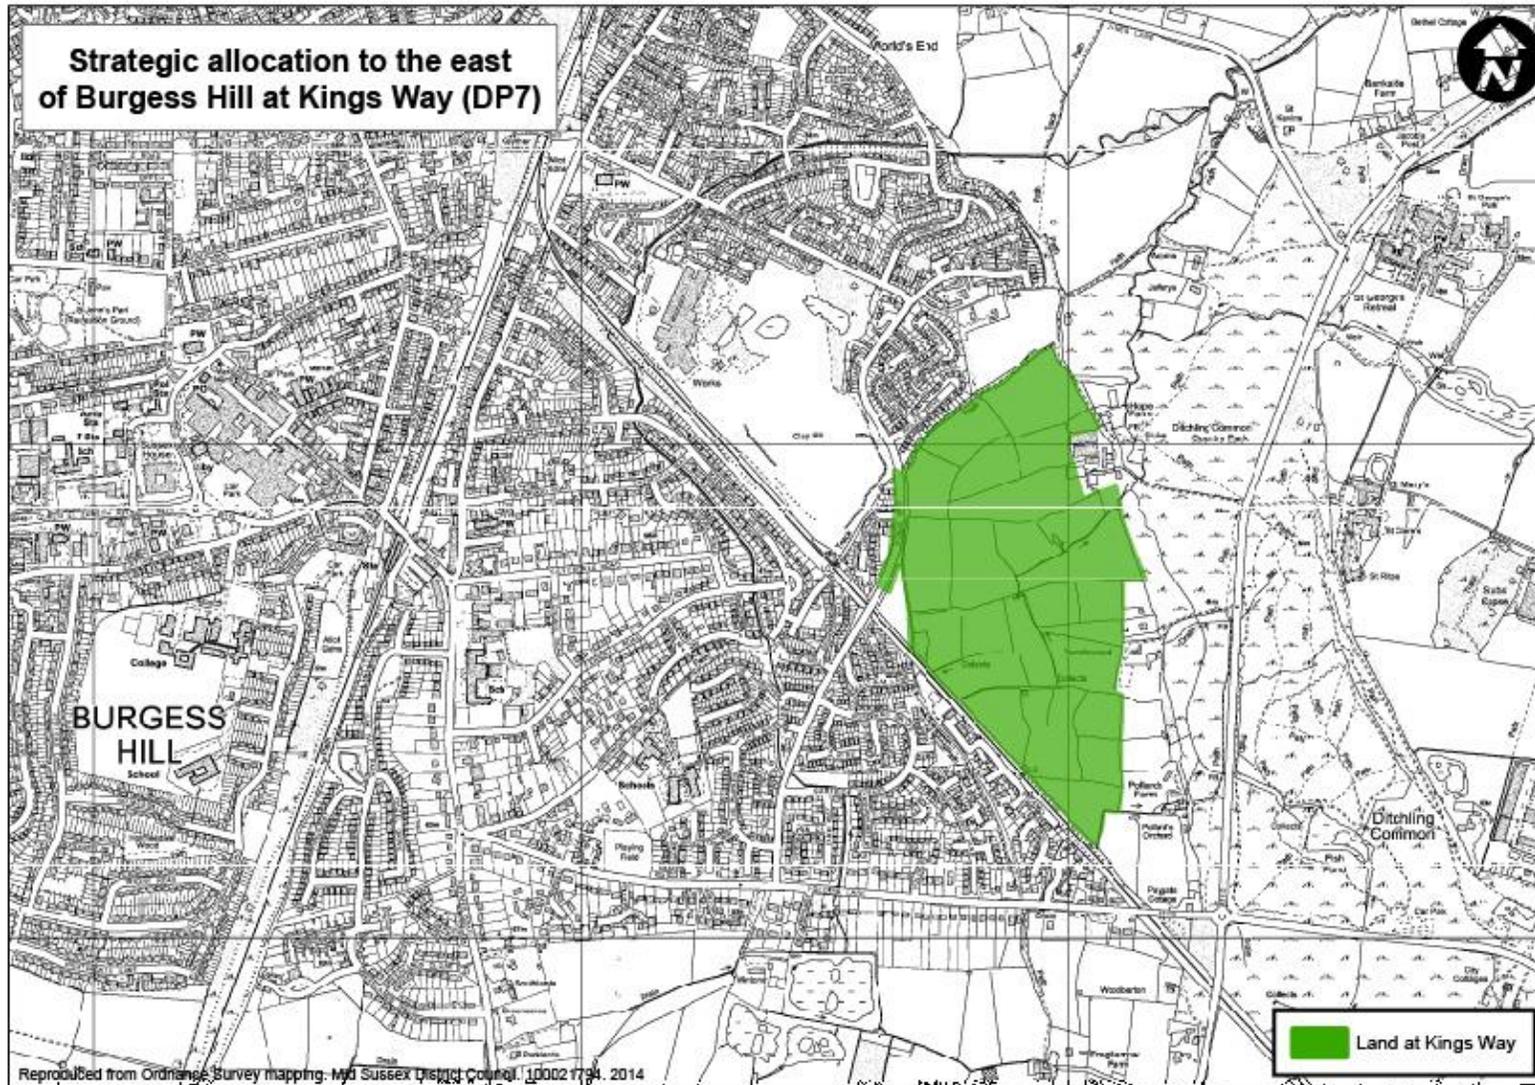

Figure 5: Land at Kings Way, Burgess Hill

**Policy DP8: Strategic Allocation to the north and north-west of Burgess Hill**

This strategic allocation is a greenfield site lying between Bedelands Nature Reserve on the east side of Burgess Hill and the Goddards Green Waste Water Treatment works to the west.

The Sustainability Appraisal for the District Plan assesses this site alongside other proposed alternatives for strategic development in Mid Sussex and this site scores favourably overall. The site contains a number of ancient woodlands and areas of flood risk that will need to be adequately mitigated.

The Burgess Hill Town Wide Strategy (2011), identified this site as a preferred location for housing development as a mixed use site for homes, with neighbourhood facilities, major education facilities (primary and secondary schools), a Centre for Community Sport, extension of the Green Circle network, and sustainable transport amongst other infrastructure requirements. The Strategy has informed this strategic policy and the Council's District-wide Infrastructure Development Plan.

The development to the north and northwest of Burgess Hill is an essential part of the delivery of the overall housing numbers for the District Plan and infrastructure for Burgess Hill and the surrounding area. The scale of development proposed is significant and the allocation will be required to meet a number of criteria. These include a phasing strategy and programme of delivery for housing (including for Gypsy and Traveller needs), employment and infrastructure as well as specific principles relating to the site. The development should also meet the general principles of development outlined in policy DP6.

The area between Maple Drive and the land known as the 'Northern Arc' is included within the allocation because it is important that the new development is integrated with the existing town and there are good public transport and pedestrian links between the development and Wivelsfield station.

The Council views the allocation to the north and north-west of Burgess Hill as a single strategic development. If it is the subject of multiple planning applications, it is important that these are led by and accord with a masterplan, infrastructure delivery strategy, including a fair and reasonable mechanism for apportioning the in-kind provision of infrastructure and/or costs, and phasing strategy. This is necessary to secure a comprehensive approach to masterplanning and infrastructure delivery for the Allocation Area as a whole and ensure that proposals for part of the Area help deliver a high quality cohesive place that meets overall policy objectives and do not prejudice future phases of development or infrastructure provision.

In May 2014, the Council resolved to grant outline planning permission for the development of up to 50,000 sqm employment floorspace to the north-west of Burgess Hill that will form part of a proposed business park.

**DP8: Strategic allocation to the north and north-west of Burgess Hill**

*Strategic Objectives: All.*

*Evidence Base: Burgess Hill: A Town Wide Strategy; Burgess Hill Employment Site Study; Coast to Capital Strategic Economic Plan; Greater Brighton City Deal; Burgess Hill: Visioning the Future; Feasibility Study for Development Options at Burgess Hill; Mid Sussex Landscape Capacity Study.*

**Strategic mixed-use development, as shown on the inset map, is allocated to the north and north-west of Burgess Hill for:**

- **Approximately 3,500 additional homes and two new neighbourhood centre areas, including retail, education, health, employment, leisure and community uses;**
- **20 – 30 hectares of land for as a high quality business park;**
- **Two new primary schools and a new secondary school campus; and**
- **A Centre for Community Sport in the vicinity of the Triangle Leisure Centre and St Paul's Catholic College.**

**In addition to conforming to the general principles in DP6 General Principles for Strategic Development at Burgess Hill, strategic mixed-use development in this location will:**

- **Be based on the indicative land use and concept plans set out in Figures X and Y [To be added at a later date.];**
- **Progress in accordance with a Masterplan, Infrastructure Delivery Strategy and Phasing Strategy prepared in collaboration with the Council and other stakeholders;**
- **Provide infrastructure, as set out in the Council's Infrastructure Development Plan, the Burgess Hill Town Wide Strategy and identified in technical assessments, implemented before or alongside development to an agreed programme of delivery;**
- **Deliver sustainable transport measures and other infrastructure requirements identified in technical assessments of transport impact, including measures to mitigate impacts upon roads in the Burgess Hill area;**
- **Identify and take account of environmental, landscape and ecological constraints and deliver opportunities as set out in Policy DP6 General Principles for Strategic Development at Burgess Hill, DP36 Biodiversity and DP37 Green Infrastructure;**
- **Take account of on-site flood plains and comply with the Flood Risk policy DP40 Flood Risk;**
- **Consider the relationship between the adjacent Goddards Green Waste Water Treatment Works and the strategic development including odour and the location of appropriate land uses; and**
- **Provide a total of 24 pitches for gypsies and travellers to contribute towards the additional need within the District for pitches.**

**To be acceptable, planning applications for part of the Strategic Allocation Area only must be accompanied by:**

- **A Masterplan and Delivery Statement that sets out:**
  1. **Site-specific infrastructure requirements and how these relate to the Allocation-wide**

**Infrastructure Delivery Strategy;**

- 2. Details of proposed development phasing, proposed triggers/ thresholds for the delivery of associated infrastructure and how these relate to the Phasing Strategy; and**
  - 3. Details of how proposed publicly accessible space and facilities would be managed and maintained.**
- **A Viability Appraisal in a format to be agreed in advance with the Council, reporting on financial viability issues and justifying the form and content of the proposals (including the amount and type of affordable housing).**

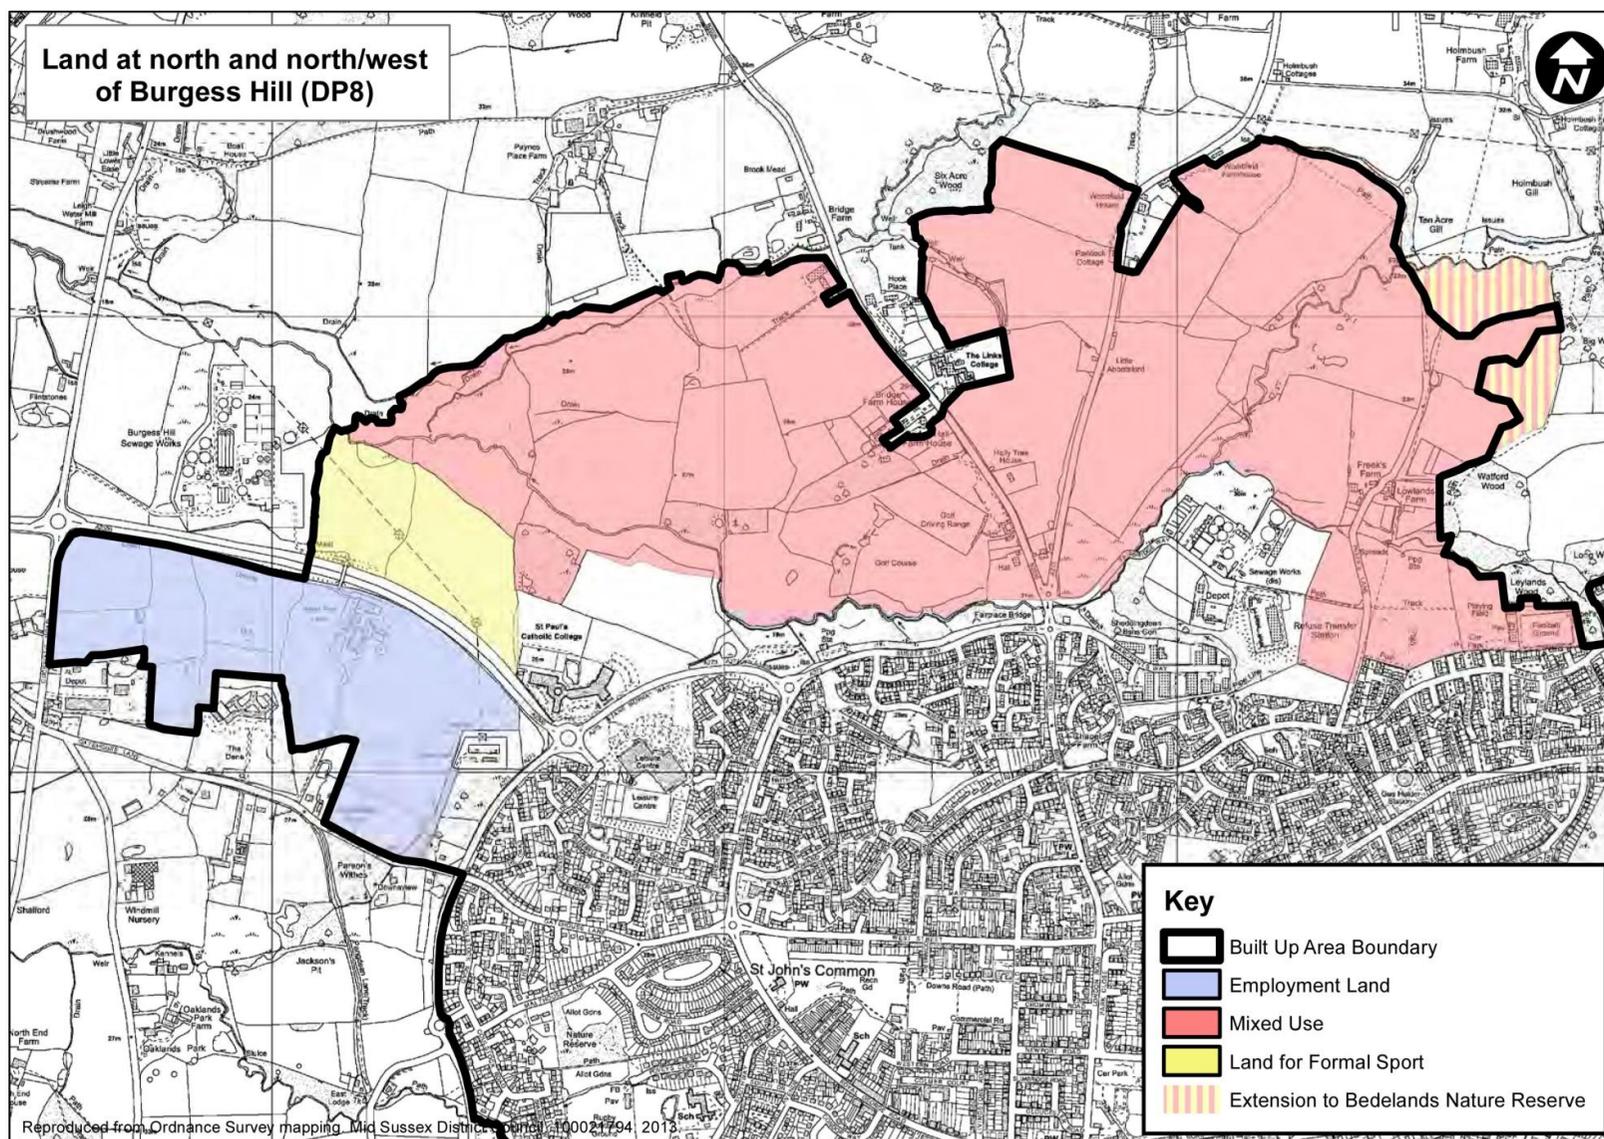

Figure 6: Strategic allocation to the north and north-west of Burgess Hill (Policy DP8)

## Development in the Countryside

### Policy DP9: Protection and Enhancement of Countryside

Mid Sussex is a rural District, and the countryside is an asset that is highly valued by the Council and local residents. The countryside is a working environment that needs to be managed in a way that enhances the attractiveness of the rural environment whilst enabling traditional rural activities to continue. The Mid Sussex Capacity Study (May 2014, paragraph 2.138) describes high quality soil as an invaluable and non-renewable natural resource and identifies only 455.7 hectares of Grade 2 land (1.4% of the District) and no Grade 1 land within Mid Sussex. A large proportion of the District (63.8%) is Grade 3 land with the potential to be classified as Grade 3a (i.e. best and most versatile agricultural land). Not all land has been surveyed in detail and more detailed field survey may be required to inform decisions about specific sites. Where identified, Grade 1, 2 and 3a agricultural land should be protected from development due to its economic importance and geological value. This is the land which is most flexible, productive and efficient and can best deliver future crops for food and non-food uses.

The primary objective of the District Plan with respect to the countryside is to secure its protection by minimising the amount of land taken for development and preventing development that does not need to be there. At the same time, it seeks to enhance the countryside, support the rural economy by accommodating well-designed, appropriate new forms of development and changes in land use where a countryside location is required and where it does not adversely affect the rural environment.

The Council has worked alongside West Sussex County Council to produce evidence, guidance and landscape strategy documents that will be referred to when implementing this policy. The Landscape Character Assessment for Mid Sussex (2005) provides a comprehensive account of the landscape character of Mid Sussex. The Assessment states that change needs to be managed so that important landscape characteristics are not lost and that opportunities to create new landscapes are maximised (paragraph 2.81). Historic Landscape Character Information (data held by West Sussex County Council) has been prepared for the District, which identifies important historic landscape features such as farmsteads and ancient field patterns.

The Strategy for the West Sussex Landscape (2005, paragraph 2.5) identifies the settlement pattern of the County - a network of small to medium-sized towns, villages and hamlets - as a strong defining characteristic. Built-up area boundaries, which set the boundaries between the built-up areas and the wider countryside, have been established for many years within the District and continue to be defined on the Policies Map.

The Mid Sussex Capacity Study (May 2014) summarises the relevant findings of the Landscape Capacity Study undertaken for the District in 2007 and includes an assessment of areas that were not included in the previous study. In addition to the significant proportion of the District under a national level landscape designation (60%), the Capacity Study (paragraph 3.22) found that “even outside of the AONB and National Park, there are no areas assessed as having high landscape capacity (i.e. likely to be able to accommodate significant allocations of housing development)”. It is therefore necessary that all development in the countryside, defined as the area outside of built up area boundaries, must seek to maintain or enhance the intrinsic beauty and tranquillity of the countryside.

Minerals are a finite resource and can only be worked where they are found. Therefore it is important to use them in the most efficient manner to secure their long term conservation. Where a development is sited in a West Sussex Minerals Consultation Area, further work will be required in conjunction with West

Sussex County Council as the Minerals Planning Authority to identify whether minerals are accessible in sufficient amounts to be economically viable to extract.

In the interests of historic and nature conservation any development proposals in the countryside must be in accordance with policies DP26 Noise, Air and Light Pollution, DP31 Listed Buildings and Other Buildings of Merit, DP32 Conservation Areas, DP33 Historic Parks and Gardens, DP34 Archaeological Sites and Heritage Assets and DP36 Biodiversity.

#### **DP9: Protection and enhancement of countryside**

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities.*

*Evidence Base: A Landscape Character Assessment for Mid Sussex, A Strategy for the West Sussex Landscape, Mid Sussex Capacity Study.*

**Development will be permitted in the countryside, defined as the area outside of built-up area boundaries on the Policies Map, provided it maintains or where possible enhances the quality of the rural and landscape character of the District, and:**

- **it is necessary for the purposes of agriculture,; or**
- **it is supported by a specific policy reference elsewhere in the Plan including DP11 Sustainable Rural Development and the Rural Economy, DP12 New Homes in the Countryside, DP16 Sustainable Tourism and DP29 Rural Exception Sites.**

**The Mid Sussex Capacity Study identifies best and most versatile agricultural land in the District as a primary constraint to development. Agricultural land of Grade 3a and above will be protected from non-agricultural development proposals. Where development of agricultural land is demonstrated to be necessary, development proposals should seek to use areas of poorer quality land in preference to that of higher quality.**

**The Mid Sussex Landscape Character Assessment, the West Sussex County Council Strategy for the West Sussex Landscape, Mid Sussex Capacity Study and other available landscape evidence (including that gathered to support Neighbourhood Plans) will be used to assess the impact of development proposals on the quality of rural and landscape character.**

**Built-up area boundaries are subject to review by Neighbourhood Plans or through a Site Allocations Development Plan Document, produced by the District Council.**

**Economically viable mineral reserves within the district will be safeguarded.**

#### **Policy DP10: Preventing Coalescence**

The settlement pattern of Mid Sussex makes an important contribution to the distinctive character of Mid Sussex and therefore a strategic objective of the Plan is to promote well located and designed development that reflects the distinctive towns and villages, retains their separate identity and character and prevents coalescence.

Policy DP10 provides the policy framework for achieving the objective based on the Mid Sussex Landscape Character Assessment (2005) which has been jointly produced with West Sussex County Council and provides a profile of each of the distinctive Landscape Character Areas within the District. The Assessment provides further information on the development of settlements in the District, how the landscape has influenced the settlement pattern and the contribution that the settlement pattern makes to the overall character of the Mid Sussex Landscape (part three of the Assessment). Part four of the Assessment sets out land management guidelines for each of the character areas. This includes guidance on how new development could be managed within the landscape.

Areas considered in the Landscape Capacity Study and updated in the Mid Sussex Capacity Study (2014), plus five additional areas included in the Capacity Study, have all been assessed according to landscape character and visual sensitivity criteria in terms of their contribution to the separation between existing settlements.

### **DP10: Preventing Coalescence**

*Strategic Objective: 2) To promote well located and designed development that reflects the District's distinctive towns and villages, retains their separate identity and character and prevents coalescence.*

*Evidence Base: Mid Sussex Landscape Character Assessment; Mid Sussex Capacity Study.*

**The individual towns and villages in the District each have their own unique characteristics. It is important that their separate identity is maintained. When travelling between settlements people should have a sense that they have left one before arriving at the next.**

**Provided it is not in conflict with Policy DP9 Protection and Enhancement of the Countryside, development will be permitted if it does not result in the coalescence of settlements which harms the separate identity and amenity of settlements, and would not have an unacceptably urbanising effect on the area between settlements.**

**Local Gaps can be identified in Neighbourhood Plans or a Site Allocations Development Plan Document, produced by the District Council, where there is robust evidence that development within the Gap would individually or cumulatively result in coalescence and the loss of the separate identity and amenity of nearby settlements. Evidence must demonstrate that existing local and national policies cannot provide the necessary protection.**

### **Policy DP11: Sustainable Rural Development and the Rural Economy**

Although Mid Sussex is a rural district, agriculture only accounts for 5% of all businesses in Mid Sussex (This is Mid Sussex 2012). The rural area supports a large number of diverse businesses that are not related to agriculture, that make an important contribution to the rural economy. Rural economic development should be encouraged where it provides good quality long-term employment, helps to improve local skills and services and contributes towards sustaining a high quality environment and well-being of the local community in accordance with policy DP9 – Development in the Countryside.

The policy supports the Mid Sussex Economic Development Strategy (2013) objective to increase opportunities for further business growth in rural areas.

This policy conforms to the National Planning Policy Framework, where it relates to the development of a sustainable rural economy (paragraph 28). Small scale enterprises needed for the processing, distribution and local retailing of local produce should be positively supported to allow the District's rural economy to grow and improve the quality of life and environment for rural communities.

This policy will not apply within the High Weald Area of Outstanding Natural Beauty, where a more restrictive policy approach, Policy DP13, will be adopted (National Planning Policy Framework paragraph 14).

#### **DP11: Sustainable rural development and the rural economy**

*Strategic Objectives: 10) To support a healthy rural economy in the villages and the countryside; and 11) To support and enhance the attractiveness of Mid Sussex as a visitor destination.*

*Evidence Base: A Landscape Character Assessment for Mid Sussex; Town and Parish Council submissions.*

**Provided it is not in conflict with Policy DP9 Protection and Enhancement of the Countryside and DP10 Preventing Coalescence:**

- **new small-scale economic development, including tourism-related development, within the countryside (defined as the area outside of built up area boundaries as per the Policies Map) will be permitted provided:**
  - it supports sustainable growth and the vitality of the rural economy; and
  - it utilises previously developed sites (where possible).
- **diversification of activities on existing farm units will be permitted provided:**
  - they are of a scale which is consistent to the location of the farm holding; and
  - they would not prejudice the agricultural use of a unit.
- **the re-use and adaptation of rural buildings for business or tourism use in the countryside will be permitted provided:**
  - the building is of permanent construction and capable of re-use without substantial reconstruction or extensive alteration;
  - the appearance and setting is not materially altered; and
  - it is not a recently constructed agricultural building which has not been or has been little used for its original purpose.

#### **Policy DP12: New Homes in the Countryside**

This policy conforms to the National Planning Policy Framework, where it relates to the development of a sustainable rural economy (paragraph 55). Past experience of dealing with proposals for agricultural dwellings has highlighted the need for clear guidance on how we will assess such proposals. This guidance is set out in the policy below.

#### **DP12: New Homes in the Countryside**

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and*

*biodiversity qualities.*

*Evidence Base: A Landscape Character Assessment for Mid Sussex; Town and Parish Council submissions.*

**New homes in the countryside will be permitted where special justification exists. Special justification is defined as:**

- **Where accommodation is essential to enable agricultural, forestry and certain other full time rural workers to live at, or in the immediate vicinity of, their place of work; or**
- **In the case of new isolated homes in the countryside, where the design of the dwelling is of exceptional quality and it enhances its immediate setting and is sensitive to the character of the area.**

**Permanent agricultural (includes forestry and certain other full time rural worker) dwellings will only be permitted to support existing agricultural activities on well-established agricultural units where:**

- **The need cannot be fulfilled by another existing dwelling on or any other existing accommodation near the agricultural unit; and**
- **It can be proven that it is essential for the proper functioning of the enterprise for one or more workers to be readily available at most times; and**
- **It can be proven that the farming enterprise is economically viable. This will also justify the size of the dwelling that the agricultural unit can sustain; and**
- **It can be proven that the size of the dwelling is commensurate with the established functional requirement of the agricultural unit.**

**Temporary agricultural dwellings essential to support a new farming activity either on a newly created agricultural unit or on an established one will be subject to the criteria above and should normally be provided by temporary accommodation.**

**Applications for the removal of agricultural occupancy conditions will only be permitted where it can be proven that there is no longer any need for the dwelling for someone solely, mainly or last working in agriculture or forestry or other rural based enterprise. This will be based on an up to date assessment of the demand for farm (or other occupational) dwellings in the area as a whole, and not just on a particular holding.**

**New 'granny annexes' that are physically separate to the dwelling are defined as a new home and are subject to the same requirements as above.**

#### **Re-use of rural buildings for residential use**

**The re-use and adaptation of rural buildings for residential use in the countryside will be permitted where:**

- **the re-use would secure the future of a heritage asset; or**
- **the re-use would lead to an enhancement of the immediate setting and the quality of the rural and landscape character of the area is maintained.**

### **Policy DP13: High Weald Area of Outstanding Natural Beauty**

The National Planning Policy Framework gives great weight to the need to conserve the landscape and scenic beauty of the Areas of Outstanding Natural Beauty (AONB). The conservation of wildlife and cultural heritage are also identified as important considerations. National policy also states that planning permission should be refused for major developments in these areas except in exceptional circumstances.

The High Weald Area of Outstanding Natural Beauty covers most of the northern part of the District. The High Weald AONB Management Plan identifies the distinctive features of the landscape and how these can be conserved and enhanced. Significant consideration should be given to the conservation and enhancement of the locally distinctive features of the High Weald Area of Outstanding Natural Beauty, as defined by the High Weald AONB Management Plan.

#### **DP13: High Weald Area of Outstanding Natural Beauty**

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities.*

*Evidence Base: The High Weald AONB Management Plan.*

**Within the High Weald Area of Outstanding Natural Beauty (AONB), as shown on the Policies Maps, development will only be permitted where it conserves or enhances natural beauty and has regard to the High Weald AONB Management Plan, in particular;**

- **the identified landscape features or components of natural beauty and to their setting;**
- **the traditional interaction of people with nature, and appropriate land management;**
- **character and local distinctiveness, settlement pattern, sense of place and setting of the AONB; and**
- **small scale proposals which support the economy and social well-being of the AONB that are compatible with the conservation and enhancement of natural beauty.**

### **Policy DP14: Ashdown Forest Special Area of Conservation and Special Protection Area**

Following consultation with Natural England, the District Council has undertaken a Habitats Regulations Assessment to test whether the District Plan, in combination with other plans and projects, is likely to have an adverse impact on the integrity of the Ashdown Forest Special Area of Conservation and Special Protection Area.

The main potential impacts arising from the District Plan that are likely to have a significant effect on the Ashdown Forest are recreational disturbance to breeding birds from an increase in visitors to the Ashdown Forest and atmospheric pollution affecting the heathland habitat from increased traffic.

The Habitats Regulations Assessment for the District Plan identifies that proposed new housing in areas close to the Ashdown Forest is likely to increase the number of visitors, with associated impacts on bird populations. This 'zone of influence' is within a 7km straight-line distance from the boundary of the Ashdown Forest identified from the 'Visitor Access Patterns on Ashdown Forest' survey published in October 2009. For this reason it will be important to counter any adverse effects from new residential development in this zone, and to put in place appropriate measures which reduce visitor pressure. The proposed approach is to provide Suitable Alternative Natural Greenspace sites (SANGs) and, in pursuance of this, the District Council has secured provision for a 33-hectare strategic SANG at East Court & Ashplats Wood in East Grinstead. SANGs are sites that cater for the recreational needs of communities in order to reduce the likelihood of increasing visitor pressure and disturbance on important nature conservation areas and should be supported by access management and monitoring measures on the Ashdown Forest itself. The provision of SANGs will be over and above that for public open space and should be of a suitable design and size to provide an alternative to visiting the Ashdown Forest. Policy DP14 below sets out an avoidance and mitigation strategy to reduce the impact of recreational disturbance.

Within the 7km zone of influence, all development will need to contribute to an appropriate level of mitigation detailed in the Habitats Regulations Assessment, in the form of providing a SANG, either on the development site itself or through a financial contribution to a strategic SANG elsewhere, and a separate financial contribution towards a Strategic Access Management and Monitoring (SAMM) strategy.

The Ashdown Forest SAMM strategy will set out measures for the management of visitors to Ashdown Forest in such a way that reduces the impact on features of interest of the designated site together with a programme for monitoring birds and the impacts of visitors. This will be prepared in association with the Conservators of Ashdown Forest, Natural England, Wealden and Lewes District Councils, and Tunbridge Wells Borough Council. A Framework will be developed which will provide guidance on how developer contributions towards the provision of SANG and the implementation of the Ashdown Forest SAMM strategy will be calculated and delivered.

In terms of air pollution, the Mid Sussex Transport Study indicates that projected traffic increases are well below the threshold deemed as significant and therefore the Habitats Regulations Assessment concludes that adverse effects are unlikely and no further measures are necessary. However, in order to promote good practice, the District Plan in Policy DP18 – Transport contains measures to encourage sustainable transport.

**DP14: Ashdown Forest Special Area of Conservation (SAC) and Special Protection Area (SPA)**

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities.*

*Evidence Base: Habitats Regulations Assessment for the Mid Sussex District Plan.*

**In order to prevent adverse effects on the Ashdown Forest SPA and SAC, the Council will work with partners to develop a strategic approach to protecting it from recreational pressures. New residential development will be required to demonstrate that adequate measures are put in place to avoid or mitigate any potential adverse effects. Where bespoke mitigation is provided, these measures will need to be in place before occupation of development and be in perpetuity. The following provisions will apply:**

- 1) Within a 400 metres buffer zone around the Ashdown Forest mitigation measures are unlikely to be capable of protecting the integrity of the SPA and therefore residential development will not be permitted.
- 2) Within a 7km zone of influence around the Ashdown Forest SPA, residential development leading to a net increase in dwellings will be required to contribute to:
  - The provision of Suitable Alternative Natural Greenspace (SANGs) to the minimum level of 8Ha per 1,000 net increase in population or in the form of financial contributions to SANGs elsewhere; and
  - The Ashdown Forest Strategic Access Management and Monitoring (SAMM) Strategy.

### Policy DP15: Setting of the South Downs National Park

The areas of land surrounding the South Downs National Park make a contribution to the setting of the South Downs National Park. The South Downs Integrated Landscape Character Assessment (2011) provides information on the landscape character of the National Park. The Assessment examines the factors that may bring change on the National Park and the adjacent areas. The Assessment identified issues outside the National Park boundaries that can impact on the character of the National Park such as light pollution and increased development and the associated landscape change. Mid Sussex District Council works in partnership with the South Downs National Park Authority to protect and enhance the natural beauty of the National Park.

The South Downs National Park Authority has purposes as specified in the Environment Act 1995. In meeting these purposes there is also a duty to seek to foster the economic and social well-being of the communities within the National Park. The purposes of the National Park are:

- (i) To conserve and enhance the natural beauty, wildlife and cultural heritage of the National Park area; and
- (ii) To promote opportunities for the understanding and enjoyment of the Park's special qualities by the public.

#### DP15: Setting of the South Downs National Park

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities.*

*Evidence Base: The South Downs Management Plan, South Downs Integrated Landscape Character Assessment.*

**Development within land that contributes to the setting of the National Park will only be permitted where it enhances and does not detract from the visual qualities and essential characteristics of the National Park, and in particular should not adversely affect the views into and out of the National Park by virtue of its location or design.**

**Development should be consistent with National Park purposes and must not significantly harm the National Park or its setting. Assessment of such development proposals will also have regard to the South Downs Management Plan and emerging National Park planning documents and strategies.**

### **Policy DP16: Sustainable Tourism**

Tourism makes an important contribution to the economy of Mid Sussex. Promoting the attractiveness of the District and its facilities is recognised in the Mid Sussex Economic Development Strategy (2013). This policy should be read alongside other policies in the Plan including DP9 Protection and Enhancement of the Countryside and DP11 Sustainable Rural Development and the Rural Economy, and, where appropriate, DP13 High Weald Area of Outstanding Natural Beauty or DP15 Setting of the South Downs National Park.

The Bluebell Railway, a privately-owned heritage railway, is an important visitor attraction to Mid Sussex. The Bluebell Railway has restored and operated scheduled steam train services on sections of the former Lewes to East Grinstead line since 1960. In view of the Bluebell Railway's value to the local and regional tourist economy and as a public transport link, the Council has supported the completion of the line to East Grinstead. In the long-term, the Bluebell Railway plans to reinstate the disused branch line westwards from Horsted Keynes (via Ardingly) to a terminus at Haywards Heath. The completion of this section will connect Bluebell Railway with main line rail services at both East Grinstead and Haywards Heath.

The proposed western extension of the Bluebell Railway from Horsted Keynes to Haywards Heath is considered to be a project of District-wide importance and is fully supported by the Council. This policy therefore safeguards the route of the proposed reinstated railway link between East Grinstead and Haywards Heath railway stations for the Bluebell Railway's operating requirements and passenger facilities, as shown on the Policies Map.

#### **DP16: Sustainable Tourism**

*Strategic Objectives: 9) To support a healthy rural economy in the villages and the countryside; and 10) To support and enhance the attractiveness of Mid Sussex as a visitor destination*

*Evidence Base: Mid Sussex Economic Development Strategy.*

**Tourism related development in the countryside (defined as the area outside of the built-up area boundaries on the Policies Map), including extensions to existing facilities, visitor accommodation and the re-use of rural buildings will be permitted provided:**

- **it supports the sustainable growth of the rural economy; and**
- **maintains or where possible enhances the quality of the rural and landscape character of the District.**

**The route of the proposed reinstated railway link between East Grinstead and Haywards Heath railway stations (as shown on the Policies Map) will be safeguarded for the Bluebell Railway from any development which could**

**prevent its completion.**

**In particular, land will be safeguarded from development which will be required to deliver the proposed reinstated railway link and associated facilities for the Bluebell Railway along the route of the railway corridor between Horsted Keynes and Haywards Heath railway stations.**

## Delivery of Infrastructure

### Policy DP17: Securing Infrastructure

A strategic objective of the District Plan is to ensure that development is accompanied by the necessary infrastructure. It is essential that any new development is supported by appropriate infrastructure to ensure that it is adequately served without overstressing existing infrastructure and putting an unacceptable strain on the environment; and to create sustainable communities.

The Infrastructure Development Plan has been developed by working with a range of authorities and infrastructure providers. It identifies the level of infrastructure required to support development and the funding available to deliver this. It includes District-wide infrastructure requirements and a comprehensive section on Town and Parish requirements.

The Mid Sussex Community Infrastructure Levy Charging Schedule will be the main mechanism for delivering the necessary infrastructure to accompany new development. The Community Infrastructure Levy Charging Schedule sets out how new building projects pay for the necessary infrastructure to support development.

This will be supplemented with negotiated agreements to secure affordable housing and additional on-site infrastructure<sup>2</sup>, and site-specific highway works<sup>3</sup> to make development acceptable in planning terms where appropriate. Planning permission for major developments will be granted on condition that a programme of infrastructure delivery is agreed before development begins (implemented by way of appropriate planning conditions/legal agreements).

### DP17: Securing Infrastructure

*Strategic Objectives: 6) To ensure that development is accompanied by the necessary infrastructure in the right place at the right time that supports development and sustainable communities.*

*Evidence Base: Community Infrastructure Levy and Affordable Housing Viability Assessment; Mid Sussex Infrastructure Development Plan; Town and Parish Council submissions and emerging Neighbourhood Plans.*

**Development will be permitted where any necessary social, physical and green infrastructure needed to support the proposed development and contribute to sustainable communities exists,**

<sup>2</sup> Section 106 of the Town and Country Planning Act 1990 (as amended)

<sup>3</sup> Section 278 of the Highways Act 1980

**or can be provided in a timely manner, through developer-funded contributions.**

**The Community Infrastructure Levy will normally be spent on infrastructure needs in the locality of the scheme that generated it.**

**Proposals by service providers for the delivery of utility infrastructure required to meet the needs generated by new development in the District and by existing communities will be encouraged and permitted, subject to accordance with other policies within the Plan.**

## **Policy DP18: Transport**

A strategic objective of the District Plan is to ensure that development is accompanied by the necessary infrastructure to support development. The District Plan aims to create sustainable communities and this includes a sustainable local transport network and ease of access to local services and facilities.

The National Planning Policy Framework requires that development should not result in “severe residual cumulative (transport) impacts” after feasible mitigation has been effected. The Mid Sussex Transport Study has been prepared to inform whether the development proposed by the District Plan is practical to deliver in principle; and whether mitigation of any adverse effects on the transport network is feasible. Any transport mitigation that is required to support development, will be included within the Infrastructure Development Plan.

The West Sussex Local Transport Plan 2011-2026 sets out the strategy for guiding future investment in highways and transport infrastructure across West Sussex. It sets a framework for considering transport infrastructure requirements associated with future development across the county. This policy supports the objectives of the Transport Plan.

Depending on the size and likely transport impact of development, a Transport Statement or Transport Assessment will be submitted alongside planning applications.

The District Council will continue to work with public transport providers to ensure that the level of service provided meets the needs of commuters and other travellers. This includes the frequency of services and quality of infrastructure such as stations and trains.

### **DP18: Transport**

*Strategic Objectives: 6) To ensure that development is accompanied by the necessary infrastructure in the right place at the right time that supports development and sustainable communities.*

*Evidence Base: Mid Sussex Transport Study; West Sussex Local Transport Plan.*

**Development will be required to support the objectives of the West Sussex Local Transport Plan, which are:**

- **A high quality transport network that promotes a competitive and prosperous economy;**
- **A resilient transport network that complements the built and natural environment whilst reducing carbon emissions over time;**
- **Access to services, employment and housing; and**

- **A transport network that feels, and is, safer and healthier to use.**

**To meet these objectives, development will only be permitted where:**

- **It is sustainably located to minimise the need for travel;**
- **It facilitates and promotes the increased use of alternative means of transport to the private car, such as the provision of, and access to, safe and convenient routes for walking, cycling and public transport;**
- **Does not cause a severe impact in terms of road safety and increased traffic congestion;**
- **Is designed to adoptable standards, or other standards as agreed by the Local Planning Authority, including road widths and size of garages; and**
- **Provides adequate car parking for the proposed development in accordance with parking standards as agreed by the Local Planning Authority or in accordance with the relevant Neighbourhood Plan.**

**Where practical developments should be located and designed to incorporate facilities for charging plug-in and other ultra-low emission vehicles.**

**Neighbourhood Plans can set local standards for car parking provision provided that it is justified by evidence.**

### **Policy DP19: Rights of Way and other Recreational Routes**

The District has a good network of footpaths, cycleways and recreational routes and these routes provide good opportunities for sustainable transport and can facilitate healthy lifestyles. Public Rights of Way are identified as a primary environmental constraint to development in the Mid Sussex Capacity Study (2014, paragraph 6.9) due to both high environmental importance and the strong policy safeguards that apply to them. In accordance with the National Planning Policy Framework (paragraph 75), the District Plan will protect and enhance public rights of way, as well as Sustrans national cycle routes (identified as a secondary constraint in the Capacity Study, paragraph 4.2) and other recreational routes.

The South Downs National Park Access Network and Accessible Natural Green Space Study assessed green infrastructure and access across the wider area including the entirety of West Sussex and the National Park. In Mid Sussex the study considers the potential for recreational pressure on the District's Accessible Natural Green Spaces (ANGs) from nearby settlements of Brighton, Crawley and Shoreham (which lack desired ANG provision) to be the main cross-boundary influence (Supporting Information, page 141). The protection and enhancement of Rights of Way and other recreational routes is important therefore not only to maintain and improve access and provision for Mid Sussex residents but also for the benefit of the wider region.

#### **DP19: Rights of Way and other Recreational Routes**

*Strategic Objectives: 5) To create and maintain easily accessible green infrastructure, green corridors and spaces around and within the towns and villages to act as wildlife corridors, sustainable transport*

*links and leisure and recreational routes; and 15) To create places that encourage a healthy and enjoyable lifestyle by the provision of first class cultural and sporting facilities, informal leisure space and the opportunity to walk, cycle or ride to common destinations.*

*Evidence Base: Neighbourhood Plans; West Sussex Local Transport Plan; West Sussex Rights of Way Improvement Plan, South Downs National Park Access Network and Accessible Natural Green Space Study, Mid Sussex Capacity Study.*

**Rights of way, Sustrans national cycle routes and recreational routes will be protected by ensuring development does not result in the loss of, or adversely affect a right of way or other recreational routes unless a new resource is provided which is of at least an equivalent value and does not sever important routes.**

**Access to the countryside will be encouraged by:**

- **Ensuring that (where appropriate) development provides safe and convenient links to rights of way and other recreational routes;**
- **Supporting the provision of additional routes within and between settlements that contribute to providing a joined up network of routes where possible;**
- **Where appropriate, encouraging making new or existing rights of way multi-functional to allow for benefits for a range of users.** *(Note: 'multi-functional will generally mean able to be used by walkers, cyclists and horse-riders).*

## **Policy DP20: Communication Infrastructure**

The District Plan supports improved digital connectivity, including the provision of high-speed broadband and 4G across the District, due to the benefits that it will bring to both business and residents in the District. The District Council supports the West Sussex – Better Connected Initiative, which aims to make it possible for 90% of the County to connect to Next Generation Access broadband (at least 24Mbps) and the remaining 10% hardest to reach areas with access to speed of at least 2Mbps by spring 2016. The adoption of a single County-wide approach to broadband delivery supports the objectives of the District Plan and the Gatwick Diamond Strategy's 'CONNECT' objectives.

The Coast to Capital Strategic Economic Plan (March 2014) also seeks to improve digital connectivity across the District, including the delivery of ultrafast broadband for the proposed Science Park in Burgess Hill.

In accordance with the National Planning Policy Framework (paragraph 43), the District Plan supports the expansion of electronic communications networks and infrastructure, currently including high speed broadband and 4G. Landscape guidelines for telecommunications developments have been prepared on a county-wide basis in the Strategy for the West Sussex Landscape (2005, paragraph 4.7) and will be referred to when implementing this policy.

### **DP20: Communication Infrastructure**

*Strategic Objectives: 7) To promote a place which is attractive to a full range of businesses, and where local enterprise thrives; and 8) To provide opportunities for people to live and work within their communities, reducing the need for commuting.*

*Evidence Base: Coast to Capital Strategic Economic Plan, Gatwick Diamond Strategy; Mid Sussex*

*Economic Development Strategy, A Strategy for the West Sussex Landscape.*

**The expansion of the electronic communication network to the towns and rural areas of the District will be supported.**

**When considering proposals for new telecommunication equipment the following criteria will be taken into account:**

- **The location and appearance of the proposed apparatus and associated structures should seek to minimise impact on the visual amenity, character or appearance of the surrounding area. On buildings, apparatus and associated structures should be located and designed in order to seek to minimise impact to the external appearance of the host building;**
- **New telecommunication equipment should not have an unacceptable effect on sensitive areas, including areas of ecological interest, areas of landscape importance, Areas of Outstanding Natural Beauty, the South Downs National Park, archaeological sites, conservation areas or buildings of architectural or historic interest and should be sensitively designed and sited to avoid damage to the local landscape character;**
- **Preference will be for use to be made of existing sites rather than the provision of new sites.**

**When considering applications for telecommunications development, regard will be given to the operational requirements of telecommunications networks and the technical limitations of the technology.**

### **Policy DP21: Leisure and Cultural Facilities and Activities**

The National Planning Policy Framework (section 8), recognises the important role that the planning system has in promoting healthy communities. A strategic objective of the Plan is to create places that encourage healthy lifestyles by the provision of first class cultural and sporting facilities, informal leisure space and the opportunity to walk, cycle or ride to common destinations. The District Council has adopted a Leisure and Cultural Strategy to increase participation in arts and culture, sport and physical activity of those living and working in the District.

This policy supports the provision of additional facilities as well as protecting existing facilities.

#### **DP21: Leisure and Cultural Facilities and Activities**

*Strategic Objectives: 15) To create places that encourage a healthy and enjoyable lifestyle by the provision of first class cultural and sporting facilities, informal leisure space and the opportunity to walk, cycle or ride to common destinations;*

*Evidence Base: Leisure and Cultural Strategy for Mid Sussex; Assessment of Open Space, Sport and Recreation.*

**Development that provides new and/or enhanced leisure and cultural activities and facilities, including allotments, in accordance with the strategic aims of the Leisure and Cultural Strategy for Mid Sussex will be supported.**

**The on-site provision of new leisure and cultural facilities, including the provision of play areas**

and equipment will be required for all new developments, where practicable, including making land available for this purpose. Planning conditions and/or planning obligations will be used to secure on site facilities. Details about the provision, including standards, of new leisure and cultural facilities will be set out in a Supplementary Planning Document.

Sites for appropriate leisure and cultural facilities to meet local needs will be identified through Neighbourhood Plans or a Site Allocations Development Plan Document produced by the District Council.

Proposals that involve the loss of open space, sports and recreational buildings and land, including playing fields, will not be supported unless:

- an assessment has been undertaken which has clearly shown the open space, sports land or recreational building to be surplus to requirements; or
- the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or
- the development is for alternative sports and recreational provision, the needs for which clearly outweigh the loss.

### Policy DP22: Community Facilities and Local Services

Community facilities and local services are important and should be retained where possible and provided alongside new development.

The Mid Sussex Infrastructure Development Plan sets out by parish, what community infrastructure is required to support future growth in their area, and why this is needed. New community facilities and improvements to existing facilities form an important part of these requirements and Town and Parish Councils have provided this information, supplemented by infrastructure providers and other consultees.

#### **DP22: Community Facilities and Local Services**

*Strategic Objectives: 6) To ensure that development is accompanied by the necessary infrastructure in the right place at the right time that supports development and sustainable communities. 12) To support sustainable communities which are safe, healthy and inclusive, and provide the amount and type of housing that meets the needs of all sectors of the community.*

*Evidence Base: Mid Sussex Infrastructure Development Plan.*

**The provision or improvement of community facilities and local services that contribute to creating sustainable communities will be supported.**

**Where proposals involve the loss of a community facility, (including those facilities where the loss would reduce the community's ability to meet its day-to-day needs locally) evidence will need to be provided that demonstrates:**

- that the use is no longer viable; or
- that there is an existing duplicate facility in the locality which can accommodate the impact of the loss of the facility; or

- that a replacement facility will be provided in the locality.

The on-site provision of new community facilities will be required on larger developments, where practicable, including making land available for this purpose. Planning conditions and/or planning obligations will be used to secure on-site facilities. Further information about the provision, including standards, of community facilities will be set out in a Supplementary Planning Document.

Community facilities and local services to meet local needs will be identified through Neighbourhood Plans or a Site Allocations Development Plan Document produced by the District Council.

## Nature and Quality of Development - Design

### Policy DP23: Character and Design

Mid Sussex has a high quality built and natural environment and this requires the design of new development to respect the character of towns and villages as well as the character of the buildings. The policy requires high quality in design with new development that contributes positively to the private and public realm (including streets and open spaces), protects valued townscapes, and creates accessible environments.

This policy conforms to the guidance set out in the National Planning Policy Framework (section 7) where it relates to design.

#### DP23: Character and Design

*Strategic Objectives: 2) To promote well located and designed development that reflects the District's distinctive towns and villages, and retains their separate identity and character; 4) To protect valued characteristics of the built environment for their historical and visual qualities, and 14) To create environments that are accessible to all members of the community.*

*Evidence Base: CABE Good Practice.*

**All development and surrounding spaces, including alterations and extensions to existing buildings and replacement dwellings, will be well designed, reflect the distinctive character of the towns and villages and create environments that are accessible to all members of the community. All applicants will be required to demonstrate that development:**

- is of high quality design and layout and includes appropriate landscaping and greenspace;
- contributes positively to the private and public realm (including streets and open spaces) to create a sense of place;
- addresses the character and scale of the surrounding buildings and landscape;
- protects open spaces, trees and gardens that contribute to the character of the area;

- protects valued townscapes and the separate identity and character of towns and villages;
- does not cause significant harm to the amenities of existing nearby residents and future occupants of new dwellings, including taking account of the impact on privacy, outlook, daylight and sunlight;
- creates safe, accessible and well connected environments;

### Policy DP24: Dwelling Space Standards

The purpose of this policy is to set minimum space thresholds for all dwellings to ensure that the floor area of new homes and associated storage space are sufficient in size to secure a satisfactory standard of accommodation for their residents. In September 2014 the Government published a draft nationally described space standard and will limit planning authorities' ability to impose technical standards beyond the nationally described space standard. This standard will only be applicable where a local planning authority has a policy in place triggering its application.

Dwelling space standards ensure that all residential development in Mid Sussex is of an acceptable size for the wellbeing of future occupants, appropriate circulation space and that homes are highly functional in terms of typical day to day needs. The space standard helps to achieve sustainable development, encouraging useable and flexible living environments in which residents can undertake a range of activities such as bringing up families, working from home and communal and social activities, as well as providing for residents' changing needs by taking into account the spatial implications of providing improved accessibility and adaptability, particularly for older or less mobile people, including meeting the requirements of accessibility standards in Building Regulations – Part M.

The District Council identified a need for such a standard and adopted a Supplementary Planning Document relating to Dwelling Space Standards in March 2009 and those standards have been used successfully since this time. The typical costs of building to these standards have been reflected in the viability assessment.

#### DP24: Dwelling Space Standards

*Strategic Objectives: 13) To provide the amount and type of housing that meets the needs of all sectors of the community; and 14) To create environments that are accessible to all members of the community.*

*Evidence Base: Mid Sussex Sustainable Communities Strategy 2008-2018, DCLG Housing Standards Review: Technical Consultation, September 2014.*

**Minimum nationally described space standards for internal floor space and storage space will be applied to all new residential development. These standards are applicable to:**

- Open market dwellings and affordable housing;
- The full range of dwelling types; and
- Dwellings created through subdivision or conversion.

**All dwellings will be required to meet these standards, other than in exceptional circumstances, where clear evidence will need to be provided to show that the internal form or special features prevent some of the requirements being met.**

**Policy DP25: Accessibility**

Accessibility is about the ease and convenience with which a place can be used by people. This policy applies to places, including areas of open space and transport infrastructure.

The District has an ageing population and residents and employees who need safe and easy access to buildings and spaces. The District Council has worked with local voluntary organisations that seek to improve access for the whole community including those with disabilities or mobility problems, for example, wheelchair users and people with physical and/or sensory disabilities. During the preparation of the District Plan, the groups have engaged in the process and this has led to the inclusion of the policy in the Plan.

The policy below seeks to ensure that accessibility is considered holistically when designing places.

In September 2014 the Government published draft housing standards that will introduce optional requirements for accessibility into Building Regulations where a local planning authority has a policy in place and evidence that a higher level of accessibility and adaptability in new residential development is viable and necessary to meet current and future housing needs. The Council has considered housing needs through a number of studies that will inform an assessment of housing and economic development needs. This has demonstrated that a high and rising proportion of residents are in need of the level of accessibility provided by the former Lifetime Homes Standards.

The Council has produced a Viability Assessment (December 2011) that incorporated the costs of meeting 'Lifetime Homes' requirements into base construction costs for all dwelling types. These standards are being phased out, but draft housing standards provide an optional requirement referred to as 'Category 2 Accessible and Adaptable dwellings' that are described as being similar to Lifetime Homes requirements. An update to the Viability Assessment in May 2013 found that base construction costs from the original assessment had increased only marginally and previous assumptions were robust. The draft Category 2 access standard requires new residential development to provide step-free access to and within the entrance storey of the dwelling. Whilst this is generally achievable, there is a risk that the need for lift provision may create a viability issue for small flatted residential buildings and therefore a threshold has been applied for this type of development below which the Category 1 access standard will apply. The provision of a lift in a block of flats was not a Lifetime Homes requirement.

**DP25: Accessibility**

*Strategic Objectives: 14) To create environments that are accessible to all members of the community.*

*Evidence Base: CABE Good Practice; Community Infrastructure Levy and Affordable Housing Viability Assessment; Housing Standards Review documents; Mid Sussex Housing and Economic Development Needs Assessment.*

**All development will be required to meet and maintain high standards of accessibility so that all users can use them safely and easily.**

**This will apply to all development, including changes of use, refurbishments and extensions, open spaces, the public realm and transport infrastructure, and will be demonstrated by the applicant.**

**With regard to listed buildings, meeting standards of accessibility should ensure that the impact on the integrity of the building is minimised.**

### **Accessible and Adaptable Dwellings**

**The Category 2 – accessible and adaptable dwelling optional requirement under Building Regulations – Part M will apply to all residential development in the district with the following exceptions:**

- 1) Category 3 – wheelchair user dwellings standards will be required for a reasonable proportion of affordable homes, generally 5%, dependent on the suitability of the site and the need at the time.**
- 2) Category 3 – wheelchair adaptable standards will be required in private extra care, assisted living or other such schemes designed for frailer older people and those in need of care or support services.**
- 3) Proposals for flatted residential buildings of fewer than 10 dwellings will be exempted from Category 2 requirements.**

## **Policy DP26: Noise, Air and Light Pollution**

Mid Sussex has a high quality environment and its residents value tranquillity and freedom from unpleasant noises, smells or light glare. New development in the District needs to be managed so that the local economy can prosper within clear guidelines and businesses can operate efficiently alongside homes without adversely affecting the environment. Soil quality must be protected in accordance with DP36 Biodiversity.

### **DP26: Noise, Air and Light Pollution**

*Strategic Objectives: 2) To promote well located and designed development that reflects the District's distinctive towns and villages; and retains their separate identity and character; and 3) To protect valued landscapes for their visual, historical and biodiversity qualities.*

*Evidence Base: Data held by Environmental Health, Air Quality Action Plan – Stonepound Crossroads, Hassocks.*

**The environment, including nationally designated environmental sites; areas of nature conservation or geological interest, wildlife habitats, and the quality of people's life will be protected from unacceptable levels of noise, light and air pollution by only permitting development where:**

#### **Noise pollution:**

- It is designed, located and controlled to minimise the impact of noise on health and quality of life, neighbouring properties and the surrounding area;**

- **If it is likely to generate significant levels of noise it incorporates appropriate noise attenuation measures;**

**Noise sensitive development is not permitted in close proximity to existing or proposed development generating high levels of noise unless adequate sound insulation measures are incorporated within the development.**

**In appropriate circumstances, the applicant will be required to provide:**

- **an assessment of the impact of noise generated by a proposed development; or**
- **an assessment of the effect of noise by an existing noise source upon a proposed development;**

**Light pollution:**

- **The impact on local amenity, intrinsically dark landscapes and nature conservation areas of artificial lighting proposals (including floodlighting) is minimised, in terms of intensity and number of fittings;**
- **The applicant can demonstrate good design including fittings to restrict emissions from proposed lighting schemes.**

**Air Pollution:**

- **It does not cause unacceptable levels of air pollution;**
- **Development on land adjacent to an existing use which generates air pollution or odour where this can be mitigated to reduce exposure to poor air quality and/or would not cause any adverse effects on the proposed development;**
- **Development proposals (where appropriate) are consistent with Air Quality Management Plans.**

## **Nature and Quality of Development - Housing**

### **Policy DP27: Housing Mix**

The 2009 Northern West Sussex SHMA and Update (2012) established that there is not a direct relationship between household size and housing size, particularly in the market sector. The Update concludes that broad requirements for different types and sizes of new market housing should be set whilst taking into account a number of factors including broader economic and demographic changes.

The North West Sussex Strategic Housing Market Assessment Update (2012) sets out that the majority of household growth is expected to result from increasing single person households within the area. However a high proportion of these are existing older households who already have housing. The Council supports the provision of flexible and specialist housing appropriate for older persons, through both public and private sector provision.

The Mid Sussex Gypsy and Traveller and Travelling Showpeople Accommodation Needs Assessment provides information on the number of pitches required to meet the need for permanent Gypsy and Traveller accommodation in the district. Sites to meet this identified need are being delivered through a Traveller Sites Allocations Document (see Policy DP30).

Work on the Allocations Document has highlighted the difficulties in the delivery of permanent Gypsy and Traveller sites and underlined that there could be shortage of suitable sites, should the identified need for such sites increase unexpectedly over the plan period. Work on this document underlines that the primary provision of permanent Gypsy and Traveller sites is best undertaken in way that can be master planned into future, currently unplanned strategic sites. Policy provision for such an approach is already supported in this District Plan through Policy DP8 - Strategic allocation to the north and north-west of Burgess Hill and within the emerging Traveller Sites Allocations Document.

### **DP27: Housing Mix**

*Strategic Objectives: 12) To support sustainable communities which are safe, healthy and inclusive; and 13) To provide the amount and type of housing that meets the needs of all sectors of the community.*

*Evidence Base: Parish Housing Needs Assessments; Mid Sussex Housing and Economic Development Needs Assessment; Mid Sussex Gypsy and Traveller and Travelling Showpeople Accommodation Needs Assessment; Northern West Sussex Affordable Housing Needs Update Report (2014); Northern West Sussex – Mid Sussex: Strategic Housing Market Assessment Update Report (2012); Strategic Housing Market Assessment for Mid Sussex (2009).*

**To support sustainable communities, housing development will:**

- **provide a mix of dwelling types and sizes from new development (including affordable housing) that reflects current and future local housing needs;**
- **meet the current and future needs of different groups in the community including older people, and vulnerable groups. This could include the provision of bungalows and other forms of suitable accommodation; and**
- **on strategic sites (i.e. those exceeding 10 hectares), provide permanent pitches for Gypsies and Travellers where a need for such accommodation is identified.**

**Evidence of housing need will be based on the best available evidence (including local evidence provided to support Neighbourhood Plans).**

### **Policy DP28: Affordable Housing**

The Northern West Sussex Affordable Housing Needs Update Report (2014) provides the underlying justification for requiring the provision of affordable housing on residential development, through affordable housing policies. The Update Report concludes that there is an estimated level of need evident in each local authority area in the Northern West Sussex Housing Market Area as each authority has an affordable housing need that is greater than the supply of such housing on an annual basis. Despite successes in reducing waiting lists by supplying more new affordable homes in recent years, for Mid Sussex this need ranges from 103 to 210 homes per year (low and high estimate scenarios).

The Update Report underlines that in setting affordable housing policies, the evidence of affordable housing need must be combined with other information, including considering the viability and deliverability of housing development. This is important in order to set a level of affordable housing that is realistic and deliverable.

The Update Report indicates that 44.2% of newly forming households in Mid Sussex cannot afford to rent or buy on the open market. However, the Viability Assessment for Community Infrastructure

Levy and Affordable Housing (2011) that also forms part of the evidence for the District Plan, indicates that raising the percentage of affordable housing sought on new sites above 30% would be unviable although 30% affordable housing is viable on all scales of development. The policy therefore sets out a reduced threshold so that all residential development will be required to provide affordable housing units either on-site, or through commuted payments towards off-site provision.

#### **DP28: Affordable Housing**

*Strategic Objectives: 12) To support sustainable communities which are safe, healthy and inclusive; and 13) To provide the amount and type of housing that meets the needs of all sectors of the community.*

*Evidence Base: Parish Housing Needs Assessments; Northern West Sussex Affordable Housing Needs Update Report (2014); Mid Sussex Housing and Economic Development Needs Assessment;*

**The Council will require the following percentage of affordable housing:**

- **A minimum of 30% affordable housing provision on all residential development providing a net increase of 4 dwellings and above;**
- **On residential developments providing a net increase of 1-3 dwellings, and in other circumstances where on-site provision is not practicable, a commuted payment towards off-site provision will be required, equivalent to providing 30% on-site affordable housing provision;**
- **A mix of tenure (normally approximately 75% social or affordable rented homes, with the remaining 25% for intermediate homes, unless the best available evidence supports a different mix).**

**Proposals that do not meet these requirements will be refused unless significant clear evidence is provided to show that the site cannot support the required affordable housing from a viability and deliverability perspective.**

**Free serviced land should be made available for the affordable housing, which should be integrated with market housing and meet the Design and Quality Standards published by the Homes and Communities Agency or any other such standard which supersedes these.**

**Details about the provision of affordable housing will be set out in a Supplementary Planning Document.**

**The policy will be monitored and kept under review having regard to the Council's Housing Strategy and any changes to evidence of housing needs.**

**Neighbourhood Plans can set local policies for affordable housing that exceed the targets set out by this policy provided that it is justified by evidence including local housing needs assessments and does not affect viability.**

#### **Policy DP29: Rural Exception Sites**

The Northern West Sussex Strategic Housing Market Assessment Update (2012) assesses rural housing within the area. Paragraphs 5.11 and 5.26 conclude that the Council should work with parishes to identify sites specifically for affordable housing that will meet local needs. It also identifies that the prices and mix of housing contribute to the identified need and affordability pressures in many rural areas. There is limited current provision for new housing development in the rural areas and rural

exception sites are sites used for affordable housing in perpetuity, usually on sites that would not normally be granted permission for housing. Rural exception sites seek to address the needs of the local community by accommodating households who are either current residents or have an existing family or employment connection.

### **DP29: Rural Exception Sites**

*Strategic Objectives: 10) To support a healthy rural economy in the villages and the countryside; 12) To support sustainable communities which are safe, healthy and inclusive; and 13) To provide the amount and type of housing that meets the needs of all sectors of the community.*

*Evidence Base: Parish Housing Needs Assessments; Town and Parish Council submissions; Mid Sussex Housing and Economic Development Needs Assessment; Mid Sussex District Council Housing Register.*

**The development of rural exception sites for affordable housing will be permitted provided:**

- **the development comprises 100% affordable housing;**
- **the housing is to meet local needs justified by the best available evidence;**
- **the occupancy of the homes is restricted in perpetuity to those with a genuine local need for affordable housing;**
- **the scale of the development respects the setting, form and character of the settlement and surrounding landscape; and**
- **it is adjacent or in close proximity to a rural settlement containing local services.**

**The delivery of rural exception sites will normally be led by Parish Councils, through planning applications, Community Right to Build schemes, Neighbourhood Development Orders or through Neighbourhood Plans.**

### **Policy DP30: Gypsies, Travellers and Travelling Showpeople**

The Central Government's Planning Policy for Traveller Sites (2012), requires Local Planning Authorities to set pitch targets for gypsies and travellers and plot targets for travelling showpeople which address the likely accommodation needs of travellers in their area.

The Mid Sussex Gypsy and Traveller and Travelling Showpeople Accommodation Needs Assessment provides information on the number of pitches required in the district. The Local Development Scheme sets out the timetable for the preparation of a Traveller Sites Allocations Document allocate sufficient sites to satisfy local need for permanent Gypsy and Traveller accommodation.

In the case of proposals within the High Weald AONB, DP13 High Weald Area of Outstanding Natural Beauty will apply.

### **DP30: Gypsies, Travellers and Travelling Showpeople**

*Strategic Objectives: 12) To support sustainable communities which are safe, healthy and inclusive; and 13) To provide the amount and type of housing that meets the needs of all sectors of the community.*

*Evidence Base: Mid Sussex Gypsy and Traveller and Travelling Showpeople Accommodation Needs*

*Assessment*

The Mid Sussex Gypsy and Traveller and Travelling Showpeople Assessment (2013 and 2014 update) identifies the need for permanent pitches and plots for the period up to 2031 as 34 additional permanent Gypsy and Traveller pitches with no identified need for Travelling Showpeople.

The Council is progressing a Traveller Sites Allocations Development Plan Document to allocate a sufficient provision of Gypsy and Traveller sites to meet identified needs within an appropriate timescale.

New Gypsy, Traveller and Travelling Showpeople sites, and extensions to existing sites, including transit sites, will be permitted provided:

- The site or extension satisfies a clear local need, as evidenced by the Mid Sussex Gypsy and Traveller Accommodation Assessment or the best available evidence;
- The site is reasonably accessible to schools, shops, health and other local services and community facilities;
- The development is located and designed to/ or capable of being designed to the recognised best practice standards to ensure good quality living accommodation for residents and that the local environment (noise and air quality) of the site would not have a detrimental impact on the health and well-being of the travellers;
- The sites are compatible with neighbouring land uses, and minimise impact on adjacent uses and built form and landscape character;
- In rural and semi-rural areas sites should not dominate the nearest settled community.
- Any site within the 7km zone of influence around Ashdown Forest will require an appropriate assessment under the Habitats Regulations to be undertaken and appropriate mitigation provided as required.

The provision of permanent Gypsy and Traveller sites will be monitored to ensure a suitable supply of such sites is provided at the appropriate time.

Existing Traveller sites will be safeguarded for Gypsy and Traveller use:

- Fairplace Hill Caravan Site, Burgess Hill
- Bedelands Caravan Site, Burgess Hill
- Horsgate Caravan Site, Cuckfield
- Walstead Caravan Site, near Lindfield
- Highfields, near Warninglid
- Pitts Head (Woodside Park), near Warninglid
- Marigold Farm Caravan Site, near Ansty

Planning permission will not be granted for an alternative use on a safeguarded site unless an alternative, replacement site has been identified and developed to provide facilities of an equivalent or improved standard (including its location) whilst there remains a need for such sites as evidenced by the Gypsy and Traveller Accommodation Assessment or the best available evidence.

Any new Gypsy and Traveller or Travelling Showpeople sites granted unrestricted, permanent planning permission and implemented shall also be safeguarded for Gypsies, Travellers or Travelling Showpeople use.

## Nature and Quality of Development – Historic Environment

### Policy DP31: Listed Buildings and Other Buildings of Merit

The heritage assets of the District include over 1,000 Listed Buildings. The District also includes many other buildings which, whilst not statutorily listed are of architectural merit or of local historic interest, make a valuable contribution to the character of the area.

In accordance with Section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990, the District Council will have regard to the desirability of preserving the listed building or its setting or any features of special architectural or historic interest which it possesses

#### **DP31: Listed Buildings and Other Buildings of Merit**

*Strategic Objectives: 2) To promote well located and designed development that reflects the District's distinctive towns and villages, retains their separate identity and character and prevents coalescence; 3) To protect valued landscapes for their visual, historical and biodiversity qualities; and 4) To protect valued characteristics of the built environment for their historical and visual qualities.*

*Evidence Base: West Sussex Historic Environment Record; Register of Listed Buildings.*

#### **Listed Buildings**

**Development will be required to protect listed buildings and their settings. This will be achieved by ensuring that:**

- **A thorough understanding of the significance of the listed building and its setting has been demonstrated. This will be proportionate to the importance of the building and potential impact of the proposal;**
- **Alterations or extensions to a listed building respect its historic form, scale, setting, significance and fabric. Proposals for the conversion or change of use of a listed building retain its significance and character whilst ensuring that the building remains in a viable use;**
- **Traditional building materials and construction techniques are normally used. The installation of uPVC windows and doors will not be acceptable;**
- **Satellite antennae, solar panels or other renewable energy installations are not sited in a prominent location, and where possible within the curtilage rather than on the building itself;**
- **Special regard is given to protecting the setting of a listed building;**
- **Where the historic fabric of a building may be affected by alterations or other proposals, the applicant is expected to fund the recording or exploratory opening up of historic fabric.**

#### **Other Buildings of Merit**

**Development that retains buildings which are not listed but are of architectural or historic merit, or which make a significant and positive contribution to the street scene will be permitted in preference to their demolition and redevelopment.**

**The Council will seek to conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the character and quality of life of the**

**District. Significance can be defined as the special interest of a heritage asset, which may be archaeological, architectural, artistic or historic.**

### **Policy DP32: Conservation Areas**

The Council's 36 conservation areas are protected through national planning legislation but are designated locally. They range from the historic town centre of East Grinstead through to smaller villages and settlements. The key characteristics of each of the conservation areas are described in conservation area character summaries on the Council's website. The Council has also produced more detailed conservation area appraisals and management plans for some conservation areas which assess local character and promote environmental enhancements. The conservation area character appraisals will be reviewed where necessary and the Council will support local groups such as local history societies to undertake this work.

#### **DP32: Conservation Areas**

*Strategic Objectives: 2) To promote well located and designed development that reflects the District's distinctive towns and villages, retains their separate identity and character and prevents coalescence; 3) To protect valued landscapes for their visual, historical and biodiversity qualities; and 4) To protect valued characteristics of the built environment for their historical and visual qualities.*

*Evidence Base: Mid Sussex Conservation Area Appraisals; Sussex Extensive Urban Surveys; West Sussex Historic Environment Record.*

**Development in a conservation area will be required to preserve and enhance its special character and appearance. This will be achieved by ensuring that:**

- **New buildings and extensions are sensitively designed to reflect the special characteristics of the area in terms of their scale, density, design and through the use of complementary materials;**
- **Open spaces, gardens, landscaping and boundary features that contribute to the special character of the area are protected. Any new landscaping or boundary features are designed to reflect that character;**
- **Traditional shop fronts that are a key feature of the conservation area are protected. Any alterations to shopfronts in a conservation area will only be permitted where they do not result in the loss of a traditional shopfront and the new design is sympathetic to the character of the existing building and street scene in which it is located;**
- **Existing buildings that contribute to the character of the conservation area are protected. Where demolition is permitted, the replacement buildings are of a design that reflects the special characteristics of the area;**
- **New pavements, roads and other surfaces reflect the materials and scale of the existing streets and surfaces in the conservation area.**

**Development will also protect the setting of the conservation area and in particular views into and out of the area.**

**New buildings of outstanding or innovative design may be acceptable in conservation areas provided that their impact would not cause material harm to the area.**

### Policy DP33: Historic Parks and Gardens

There are 9 Registered Parks and Gardens of Special Historic Interest in Mid Sussex. In addition there are a large number of historic parkscapes which are unregistered but which appear on the West Sussex County Council's Sites and Monuments Record. The need to protect such landscapes is also recognised.

#### DP33: Historic Parks and Gardens

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities*

*Evidence Base: West Sussex Historic Environment Record.*

**The character, appearance and setting of a registered park, or park or garden of special local historic interest will be protected. This will be achieved by ensuring that any development within or adjacent to a registered park, or park or garden of local historic interest will only be permitted where it protects and enhances its special features, setting and views into and out of the park or garden.**

### Policy DP34: Archaeological Sites

There are 25 Scheduled Ancient Monuments in Mid Sussex which are statutorily protected and which are identified on the Policies Map and over 500 sites of archaeological interest which appear on the West Sussex County Council's Sites and Monuments Record.

#### DP34: Archaeological Sites and Heritage Assets

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities.*

*Evidence Base: West Sussex Historic Environment Record.*

**Sites of archaeological interest (such as scheduled Ancient Monuments) and their settings will be protected and enhanced.**

**Development that would have a detrimental impact on sites of archaeological importance and their settings will only be permitted where the benefits of the proposal (which cannot reasonably be located elsewhere) are so great as to outweigh the possible effects on the archaeological importance of the site.**

**Where it appears that a development may impact upon heritage assets with archaeological interest, applicants will be required to carry out an appropriate archaeological assessment.**

## Nature and Quality of Development – Natural Resources

### Policy DP35: Trees, Woodland and Hedgerows

Trees, woodland and hedgerows make a valuable landscape, amenity and biodiversity contribution to the District, both in urban and rural areas. Mid Sussex is a heavily wooded district with two thirds of this being ancient woodland.

In particular, trees, woodland and hedgerows form part of the District's green infrastructure, are important for health and well-being, and increase resilience to the effects of climate change.

The District Plan recognises this contribution and will support the protection of trees, woodland and hedgerows, as well as encouraging new planting. Development will be required to incorporate trees, woodland and hedgerows into the design and landscaping scheme.

The District Council will make Tree Preservation Orders or attach planning conditions, in line with national guidance, to protect specific trees, a group of trees or woodlands in the interests of amenity or where they are threatened by development. The amenity value of trees will take into account visibility and characteristics relating to the individual, collective and wider impact including:

- Size and form; and
- Future potential as an amenity; and
- Rarity, cultural or historical value; and
- Contribution to, and relationship with, the landscape; and
- Contribution to the character and appearance of a conservation area.

#### **DP35: Trees, Woodland and Hedgerows**

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities; 4) To protect valued characteristics of the built environment for their historical and visual qualities; and 5) To create and maintain easily accessible green infrastructure, green corridors and spaces around and within the towns and villages to act as wildlife corridors, sustainable transport links and leisure and recreational routes.*

*Evidence Base: Green Infrastructure mapping; Mid Sussex Ancient Woodland Survey, Tree and Woodland Management Guidelines, Tree Preservation Order records.*

**The District Council will support the protection and enhancement of trees, woodland and hedgerows, and encourage new planting. In particular, ancient woodland and aged or veteran trees will be protected.**

**Development that will damage or lead to the loss of trees, woodland or hedgerows that contribute, either individually or as part of a group, to the visual amenity value or character of an area, and/ or that have landscape, historic or wildlife importance, will not normally be permitted.**

**Trees, woodland and hedgerows will be protected and enhanced by ensuring development:**

- **incorporates existing important trees, woodland and hedgerows into the design of new development and its landscape scheme; and**
- **prevents damage to root systems and takes account of expected future growth; and**

- where possible, incorporates retained trees, woodland and hedgerows within public open space rather than private space to safeguard their long-term management; and
- has appropriate protection measures throughout the development process; and
- takes opportunities to plant new trees, woodland and hedgerows within the new development to enhance green infrastructure and increase resilience to the effects of climate change.

Proposals for works to trees will be considered taking into account:

- the condition and health of the trees; and
- the contribution of the trees to the character and visual amenity of the local area; and
- the amenity and nature conservation value of the trees; and
- the extent and impact of the works; and
- any replanting proposals.

The felling of protected trees will only be permitted if there is no appropriate alternative. Where a protected tree or group of trees is felled, a replacement tree or group of trees, on a minimum of a 1:1 basis and of an appropriate size and type, will normally be required. The replanting should take place as close to the felled tree or trees as possible having regard to the proximity of adjacent properties.

### Policy DP36: Biodiversity

Coupled with the pressure for new development is the importance of conserving and enhancing areas of importance for biodiversity and nature conservation. The District has a number of valued landscapes, habitats and species which need to be protected and enhanced. The District Plan recognises the importance of the protection and conservation of areas of importance for nature conservation and the valuable contribution made by these sites and features in conserving biodiversity and geodiversity of our natural heritage, together with opportunities for education and employment.

Mid Sussex lies adjacent to the Ashdown Forest (within Wealden District), a European designated Special Protection Area and Special Area of Conservation. Policy DP14 looks at protecting this area. Mid Sussex also contains 13 Sites of Special Scientific Interest, 50 Sites of Nature Conservation Importance and 6 Local Nature Reserves. Nearly 16% of the District is covered by Ancient Woodland.

This policy reflects the requirements of the National Planning Policy Framework (section 11) where it relates to biodiversity and the natural environment. It takes into account the duty on the District Council to have regard to the purpose of conserving biodiversity. Development proposals should be informed by local ecological and geological evidence and national guidance.

#### DP36: Biodiversity

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities; and 5) To create and maintain easily accessible green infrastructure, green corridors and spaces around and within the towns and villages to act as wildlife corridors, sustainable transport links and leisure and recreational routes.*

*Evidence Base: Biodiversity 2020; Biodiversity Action Plan; Biodiversity Opportunity Areas;*

*Green Infrastructure mapping; Habitats and Species Records; Mid Sussex Ancient Woodland Survey; West Sussex SSCI Register.*

**Biodiversity will be protected and enhanced by ensuring development:**

- Pursues and takes opportunities to improve, enhance, manage and restore biodiversity, so that there is a net gain in biodiversity, including through creating new designated sites and incorporating biodiversity features within developments; and
- Protects existing biodiversity, so that there is no net loss of biodiversity. Appropriate measures should be taken to avoid and reduce disturbance to sensitive habitats and species. Unavoidable damage to biodiversity must be offset through ecological enhancements and mitigation measures (or compensation measures in exceptional circumstances); and
- Minimises habitat and species fragmentation and maximises opportunities to enhance and restore ecological corridors to connect natural habitats and increase coherence and resilience; and
- Avoids damage to and protects the special characteristics of internationally designated Special Protection Areas, Special Areas of Conservation; nationally designated Sites of Special Scientific Interest, Areas of Outstanding Natural Beauty; and locally designated Sites of Nature Conservation Importance, Local Nature Reserves and Ancient Woodland or to other areas identified as being of nature conservation or geological interest, including wildlife corridors, aged or veteran trees, and Nature Improvement Areas.

**Designated sites will be given protection and appropriate weight according to their importance and the contribution they make to wider ecological networks.**

**Valued soils will be protected and enhanced, including the best and most versatile agricultural land, and development should not contribute to unacceptable levels of soil pollution.**

**Geodiversity will be protected by ensuring development prevents harm to geological conservation interests, and where possible, enhances such interests.**

### **Policy DP37: Green Infrastructure**

Mid Sussex has a high quality natural and built environment and it is important that new development contributes to the protection, enhancement and creation of new green space within the District.

'Green infrastructure' is a connected network of multi-functional greenspace, both in urban and rural areas, that delivers a wide range of environmental, social and economic benefits, including improving quality of life. Some of the functions of green infrastructure include providing habitats for plants and animals and wildlife corridors from one habitat to another, increasing resilience to the effects and impacts of climate change, and improving the health and well-being of local communities with access to the countryside and green areas. Green infrastructure can also include areas of water and flood management and land for food production.

#### **DP37: Green Infrastructure**

*Strategic Objectives: 3) To protect valued landscapes for their visual, historical and biodiversity qualities;*

and 5) To create and maintain easily accessible green infrastructure, green corridors and spaces around and within the towns and villages to act as wildlife corridors, sustainable transport links and leisure and recreational routes.

*Evidence Base: Biodiversity Action Plan; Biodiversity Opportunity Areas; Green Infrastructure mapping; Habitats and Species Records; Mid Sussex Ancient Woodland Survey; West Sussex SNCI Register.*

**Green infrastructure will be protected and enhanced by ensuring development:**

- **Contributes to the establishment of green infrastructure and supports its improvement, enhancement, management and restoration to develop a connected network of multi-functional greenspace, including linking with rivers and floodplains; and**
- **Responds to existing on-site green infrastructure and provides on-site natural greenspace enhancements for all new developments where practicable, including making land available for this purpose; and**
- **Promotes the restoration, management and expansion of priority habitats in the District; and**
- **Improves access to and understanding of natural greenspace and nature conservation features, including recognising the importance and role of green infrastructure to the ecosystem, biodiversity, public rights of way, health and well-being, the water environment, community facilities, climate change, and allotments.**

**Land which will be required to create and deliver a multi-functional ‘Green Circle’ around Burgess Hill will be safeguarded from development. In particular, the following areas as shown on the Policies Map will be allocated for informal open space:**

- **Batchelors Farm;**
- **Land south of Nightingale Lane;**
- **Land adjoining Jane Murray Way, York Road and Sussex Way;**
- **Land to the north of Sheddingdean and Leylands Park, including Bedelands Farm; and**
- **The ‘Railway Land’ to the north and south of Wivelsfield Station.**

**Developer contributions will be used to secure delivery of the Green Circle.**

## **Nature and Quality of Development – Sustainable Resources**

### **Policy DP38: Sustainable Design and Construction**

The District Council, with four other West Sussex authorities, commissioned the ‘West Sussex Sustainable Energy Study’ to inform policies on carbon emission standards for new development. The Study was prepared to inform planning policies which positively encourage reduced energy consumption and carbon emissions from buildings and greater sustainable energy generation. The Study makes a number of recommendations (section 9 of the Study) for inclusion in future planning documents.

However, the policy context has changed significantly since the original Sustainable Energy Study (2009) and the costs of many renewable energy technologies are falling. The Mid Sussex Sustainable Energy Study (2014) updates this earlier work and assesses the local potential for renewable and low carbon energy development. The Study recommends a policy that requires applicants to demonstrate

through their Sustainability Statement how they have considered government objectives and strategy in relation to sustainable energy use and zero carbon, and promotes the delivery of renewable and low carbon energy in accordance with paragraph 17 of the National Planning Policy Framework.

### **DP38: Sustainable Design and Construction**

*Strategic Objectives: 1) To promote development that makes the best use of resources and increases the 'sustainability of communities within Mid Sussex, and its ability to adapt to climate change.*

*Evidence Base: Gatwick Sub Region Water Cycle Study; West Sussex Sustainable Energy Study, Mid Sussex Sustainable Energy Study.*

**All new major development proposals (defined as the creation of 10 dwellings/1000m<sup>2</sup> floorspace or more, or application sites over 1ha) must be accompanied by a Sustainability Statement which addresses the following aspects of sustainable design and construction:**

#### **Energy efficiency**

**Demonstrating how the proposals take account of the following energy hierarchy:**

- **Minimising energy use through the design and layout of the scheme and its individual buildings.**
- **Supplying energy efficiently through assessing feasibility and viability of establishing or connecting to communal heating networks (supplied by biomass boilers, biomass/gas CHP or heat pumps).**
- **Using renewable sources of energy.**

**For new residential developments, applicants must demonstrate how their proposals also address the national timetable for zero carbon homes, including fabric energy efficiency standards, on-site renewable/low carbon technologies and allowable solutions once adopted by government.**

#### **Waste and resources**

**Demonstrating how the development will maximise efficient use of resources, including minimising waste and maximising recycling/re-use of materials through both construction and occupation.**

#### **Water use**

**Demonstrating how the development will promote water efficiency in accordance with Policy DP41: Water Infrastructure and the Water Environment.**

#### **Resilience to climate change**

**Demonstrating how the risks associated with future climate change have been planned for as part of the layout of the scheme and design of its buildings to ensure its longer term resilience.**

### Policy DP39: Renewable Energy Schemes

The Mid Sussex Sustainable Energy Study (2014) assessed the potential for renewable energy schemes in Mid Sussex and concluded that the level of technical and capacity constraints in the District were likely to prevent major new renewable energy schemes from coming forward over the Plan period. Renewable energy schemes were likely to be relatively small-scale and the local community could have a key role through Neighbourhood Plans or other local initiatives. Such projects could help support energy security, respond to fuel poverty, reduce carbon emissions and provide a longer term financial return for communities.

The National Planning Policy Framework (paragraph 17, NPPF) lists the use of renewable resources, including the development of renewable energy, as a core planning principle. Paragraph 97 of the NPPF requires local planning authorities to maximise renewable and low carbon energy development while ensuring that adverse impacts are addressed satisfactorily and support community-led initiatives for renewable and low carbon energy.

#### DP39: Renewable Energy Schemes

*Strategic Objectives: 1) To promote development that makes the best use of resources and increases the 'sustainability of communities within Mid Sussex, and its ability to adapt to climate change.*

*Evidence Base: Gatwick Sub Region Water Cycle Study; Mid Sussex Capacity Study; Mid Sussex Landscape Capacity Study; Mid Sussex Sustainable Energy Study; West Sussex Sustainable Energy Study.*

**Proposals for new renewable and low carbon energy projects, including community-led schemes, will be permitted provided that any adverse local impacts can be made acceptable, with particular regard to:**

- **Landscape and visual impacts, including cumulative impacts, such as on the setting of the South Downs National Park and High Weald Area of Outstanding Natural Beauty, and the appearance of existing buildings.**
- **Ecology and biodiversity, including protected species, and designated and non-designated wildlife sites.**
- **Residential amenity including visual intrusion, air, dust, noise, odour, traffic generation, recreation and access.**

**Assessment of impacts will need to be based on the best available evidence, including landscape capacity studies.**

### Policy DP40: Flood Risk and Drainage

In accordance with the National Planning Policy Framework, a Strategic Flood Risk Assessment has been prepared to identify areas that are at risk from flooding - this has informed the preparation of the

District Plan. Strategic Flood Risk Assessment mapping is kept up-to-date with new flood events and updated releases of information from the Environment Agency.

The Strategic Flood Risk Assessment provides information on the use of Sustainable Drainage Systems (SuDS) to avoid increased flood risk or adverse impact on water quality. Well-designed SuDS rarely function with only a single purpose and should be considered early in the design process due to their relationship with other design considerations. Guidance on the potential benefits, suitability and feasibility for different SuDS types is available in the 'Water. People. Places.' document prepared for South East England authorities. This guidance should be used as part of the initial planning and design process for all types of residential, commercial and industrial development.

Development proposals in areas at risk of flooding will be considered in accordance with the National Planning Policy Framework (paragraph 103 and 104). Development proposals in areas at risk of flooding should be supported by site-specific flood risk assessments in accordance with paragraphs 103 and 104 of the NPPF.

The Gatwick Sub Region Water Cycle Study provides an assessment of the capacity of current water infrastructure to accommodate growth without adversely affecting the environment. Section 8 of the Study sets out a number of recommendations that address capacity and quality issues identified in the Study. Section 8.2 makes recommendations for Sustainable Drainage Systems and these recommendations have been included in the policy.

#### **DP40: Flood Risk and Drainage**

*Strategic Objectives: 1) To promote development that makes the best use of resources and increases the sustainability of Mid Sussex and its ability to adapt to climate change.*

*Evidence Base: Gatwick Sub Region Water Cycle Study; Strategic Flood Risk Assessment, Water.People.Places SuDS guidance.*

**Proposals for development will need to follow a sequential risk-based approach, ensure development is safe across its lifetime and not increase the risk of flooding elsewhere. The District Council's Strategic Flood Risk Assessment (SFRA) should be used to identify areas at present and future flood risk from a range of sources including fluvial (rivers and streams), surface water (pluvial), groundwater, infrastructure and reservoirs.**

**Particular attention will be paid to those areas of the District that have experienced flooding in the past and proposals for development should seek to reduce the risk of flooding by achieving a reduction from existing run-off rates.**

**Sustainable Drainage Systems (SuDS) should be implemented in new developments where appropriate, to avoid any increase in flood risk and protect surface and ground water quality. Arrangements for the long term maintenance and management of SuDS should also be identified.**

- **For the redevelopment of brownfield sites, any surface water draining to the foul sewer must be disconnected and managed through SuDS following the remediation of any previously contaminated land.**
- **SuDS should be sensitively designed and located to promote improved biodiversity, an enhanced landscape and good quality spaces that improve public amenities in the area, where possible.**
- **The preferred hierarchy of managing surface water drainage from any development is:**
  - 1. Infiltration Measures**
  - 2. Attenuation and discharge to watercourses; and if these cannot be met,**
  - 3. Discharge to surface water only sewers.**

**Land that is considered to be required for current and future flood management will be safeguarded from development and proposals will have regard to relevant flood risk plans and strategies.**

**Policy DP41: Water Infrastructure and the Water Environment**

The European Water Framework Directive came into force in December 2000 and became law in December 2003. The Water Framework Directive sets out a requirement to prevent deterioration of water quality and to achieve good ecological status in rivers, estuaries and coastal waters, together with good status of groundwater by at least 2027. The policy requires new development proposals to be in accordance with this Directive.

The Council has worked with Crawley Borough Council, Horsham District Council and Reigate and Banstead Borough Council to analyse the existing water environment, assess environmental capacity and establish the water infrastructure required to deliver growth, in accordance with paragraph 162 of the NPPF. The Gatwick Sub Region Water Cycle Study provides an assessment of the capacity of current water infrastructure to accommodate growth without adversely affecting the environment. Section 8 of the Study sets out a number of recommendations which would address capacity and quality issues identified in the Study. The policy requires new development proposals to accord with the findings of the Study.

Water scarcity is an increasing concern as the population of the district and demand increases as new homes are built. Climate change may further increase demand and put public water supply under greater pressure in the future. South East Water has produced its Water Resources Management Plan (2014) covering the period 2015 to 2040. The Plan states that “calculations show that with less water being available for use, combined with an increasing overall demand for water, we will have insufficient supplies to meet demand”. The Plan set out a water efficiency strategy that seeks to reduce water consumption for all households from 165 litres per person per day to 148.3 litres per person per day by 2040 and highlights the importance of partnership working with Local Authorities to incorporate water efficiency into all new buildings.

Recommendation 1 of the Water Cycle Study proposes a standard above that required by Building Regulations. For new residential development, an internal/indoor water usage standard of 105 litres of water consumed per person per day (l/p/d) and for non-residential developments to meet a BREEAM ‘Good’ standard for water consumption targets.

In September 2014 the Department for Communities and Local Government published draft housing standards that will introduce an optional requirement for water efficiency into the Building Regulations that would be triggered where a local planning authority has a policy in place that does so on the basis of a clear and evidenced need. The policy therefore incorporates this optional requirement for all new dwellings to deliver estimated average water consumption of no more than 110 litres per person per day. The need for such a requirement in Mid Sussex is demonstrated in the Water Cycle Study which recommends a water consumption standard of 105 litres per person per day for internal/indoor water usage. In addition to this the optional requirement includes an allowance for external water use of 5 litres per person per day.

Recommendation 4 (page 105) of the Study has shaped the approach to foul and surface water provision and water supply in this policy. The recommendation suggests that developments for more than 10 dwellings should submit a Water Sustainability and Drainage Assessment as part of their application to demonstrate that they have met the requirements of this policy. It is necessary for the District Plan to address the provision of water and sewerage infrastructure because it is not possible to identify all infrastructure required over the plan period as water companies only plan in five year periods through Asset Management Plans due to the way they are regulated.

Developers will be required to demonstrate that there is adequate capacity or additional infrastructure can be provided in time both on and off the site to serve the development and that it would not lead to problems for existing users. Developers will need to show that they have engaged with service providers at the earliest opportunity to establish the proposed development's demand for water supply and wastewater infrastructure and how this can be met. In some circumstances this may make it necessary for developers to carry out appropriate studies to ascertain whether the proposed development will lead to overloading of existing water and wastewater infrastructure.

Statutory undertakers have only limited powers under the Water Industry Act 1991 to prevent connection ahead of required infrastructure upgrades and are reliant on robust policies to ensure improvements are provided prior to occupation and therefore can achieve sustainable development in accordance with National Planning Practice Guidance (NPPG, Reference ID: 34-001-20140306). It is essential to ensure that infrastructure is in place to avoid unacceptable impacts on the environment such as sewage flooding of residential and commercial property, pollution of land and watercourses plus water shortages with associated low pressure water supply problems. Where there is a capacity constraint and no improvements are programmed by the statutory undertaker the developer will need to contact the statutory undertaker/s to agree the improvements required and how these will be funded prior to any occupation of the development.

#### **DP41: Water Infrastructure and the Water Environment**

*Strategic Objectives: 1) To promote development that makes the best use of resources and increases the sustainability of Mid Sussex and its ability to adapt to climate change.*

*Evidence Base: Building Regulations (Approved Document G); Gatwick Sub Region Water Cycle Study; Housing Standards Review documents; South East Water - Water Resources Management Plan 2014, Strategic Flood Risk Assessment.*

**New development proposals must be in accordance with the objectives of the Water Framework Directive, and accord with the findings of the Gatwick Sub Region Water Cycle Study with respect to water quality, water supply and wastewater treatment and consequently the optional requirement under Building Regulations – Part G applies to all new residential development in the district. Development must meet the following water consumption standards:**

- Residential units should meet a water consumption standard of 110 litres per person per day (including external water use);
- Non-residential buildings should meet the equivalent of a 'Good' standard, as a minimum, with regard to the BREEAM water consumption targets for the development type.

**Development proposals which increase the demand for off-site service infrastructure will be permitted where the applicant can demonstrate;**

- that sufficient capacity already exists off-site for foul and surface water provision. Where capacity off-site is not available, plans must set out how appropriate infrastructure improvements approved by the statutory undertaker will be completed ahead of the

- development's occupation; and
- that there is adequate water supply to serve the development.

**Planning conditions will be used to secure necessary infrastructure provision.**

**Development should connect to a public sewage treatment works. If this is not feasible, proposals should be supported by sufficient information to understand the potential implications for the water environment.**

**The development or expansion of water supply or sewerage/sewage treatment facilities will normally be permitted, either where needed to serve existing or proposed new development, or in the interests of long term water supply and waste water management, provided that the need for such facilities outweighs any adverse land use or environmental impacts and that any such adverse impact is minimised.**

## Chapter 5: Monitoring the District Plan

Monitoring is an essential process to ensure the District Plan is meeting its strategic objectives, that the planned housing, employment growth and infrastructure are being delivered and to ensure the effective and timely delivery of development and infrastructure. It is important that there are mechanisms in place for the Council to identify changing circumstances and take appropriate action if required.

The monitoring schedule sets out a range of indicators including output indicators that assess the impact of individual policies and contextual indicators that facilitate understanding of the wider context that may be influencing output indicators or identify where future intervention may be necessary. These are based on those used for the Sustainability Appraisal to maintain close links between the two documents. It is important that indicators chosen can be monitored in a robust and consistent way throughout the Plan period. The indicators are reported through the Council's monitoring information and will be made available as soon as possible.

The Council's monitoring will also include keeping an up to date evidence base as well as ongoing co-operation with neighbouring authorities on agreed strategic priorities.

If it appears that policies are not being effective, or are no longer appropriate in the light of more recent national policies or local circumstances, then action will be taken to review the policy or policies concerned. As set out in the Local Development Scheme, a Site Allocations Development Plan Document has been programmed to enable delivery if this is not being achieved through Neighbourhood Plans.

**Monitoring Schedule**

<b>Policy</b>	<b>Strategic Objectives</b>	<b>Indicator</b>	<b>Target</b>	<b>Implementation</b>	<b>Source</b>
<b>DP1:</b> Sustainable Development in Mid Sussex	4, 5, 7, 11, 16	Percentage of new and converted dwellings on previously developed (brownfield) land	Maximise	Developers, Local Authority	West Sussex County Council monitoring
<b>DP2:</b> Economic Development	7,8	Net increase / decrease in commercial (Use Classes B1 (b, c), B2, B8) and office (B1 (a) and A2) floorspace	Net increase per annum	Developers, Local Authority	West Sussex County Council Commercial, Industrial and Leisure Land Availability Survey
		Provision of new employment floorspace in neighbouring authorities	Monitoring of cross-boundary implications	Local authorities	Local authorities
<b>DP3:</b> Town Centre Development	9	Increased floor space permitted and delivered for improvements to the Town Centres	Maximise in accordance with DP3: Town Centre Development	Developers, Local Authority	Mid Sussex District Council monitoring
<b>DP4:</b> Village Centre and Neighbourhood Centre Development	9	Net increase / decrease in commercial (Use Classes B1 (b, c), B2, B8) and office (B1 (a) and A2) floorspace	Net increase per annum	Developers, Local Authority	West Sussex County Council Commercial, Industrial and Leisure Land Availability Survey
<b>DP5:</b> Housing	All	Housing Completions in Mid Sussex (net)	To meet identified needs	Developers, Local Authority, Highway authority, public agencies, utility companies and service providers	Mid Sussex District Council/West Sussex County Council annual monitoring

Policy	Strategic Objectives	Indicator	Target	Implementation	Source
		Housing completions in neighbouring authorities (net)	Monitoring of cross-boundary implications	Local authorities	Local authorities
<b>DP6:</b> General Principles for Strategic Development at Burgess Hill	All	The objectives listed under DP6 are monitored under their separate policy areas	-	-	-
<b>DP7:</b> Strategic Allocation to the east of Burgess Hill at Kings Way	All	Housing completions on allocated site DP7	In accordance with DP7	Developers	Mid Sussex District Council monitoring
<b>DP8:</b> Strategic Allocation to the north and north west of Burgess Hill	All	Housing completions on allocated site DP8	In accordance with DP8	Developers	Mid Sussex District Council monitoring
<b>DP9:</b> Protection and Enhancement of Countryside	3	Percentage of new and converted dwellings on previously developed (brownfield) land	Maximise	Developers, Local Authority	West Sussex County Council monitoring
<b>DP10:</b> Preventing Coalescence	2	Number of planning permission granted in Local Gaps, where these have been defined in Neighbourhood Plans	Minimise	Local Authority	Mid Sussex District Council / Neighbourhood Plan monitoring
<b>DP11:</b> Sustainable Rural Development and the Rural	10, 11	Number of new commercial developments approved within the countryside	Increase	Developers, Local Authority	Mid Sussex District Council monitoring

Policy	Strategic Objectives	Indicator	Target	Implementation	Source
Economy					
<b>DP12:</b> New Homes in the Countryside	3	Number of applications for new dwellings in the countryside overturned on appeal	Zero	Local authority	Mid Sussex District Council monitoring
<b>DP13:</b> High Weald Area of Outstanding Natural Beauty	3	Number of applications approved contrary to advice from the High Weald AONB Unit	Zero	Local authority	Mid Sussex District Council monitoring
<b>DP14:</b> Ashdown Forest Special Area of Conservation and Special Protection Area	3	SANG capacity	Sufficient for anticipated development	Local Authority	Mid Sussex District Council monitoring
		Implementation of SAMM	Monitoring of projects within Strategy	Ashdown Forest Conservators, Mid Sussex District Council, Wealden DC	Mid Sussex District Council/ other
<b>DP15:</b> Setting of the South Downs National Park	3	Number of applications refused as contrary to this policy but overturned on appeal	Zero	Public agencies, Local Authority	Mid Sussex District Council/SDNP Authority
<b>DP16:</b> Sustainable Tourism.	9, 10	Number of jobs in the tourism sector	Maximise		Tourism South East
		Number of visitors staying overnight	Increase	Local authority	Tourism South East
<b>DP17:</b> Securing Infrastructure	6	Monitor infrastructure funds received, by Parish and in accordance with Monitoring requirements set out in the CIL Regulations and	Amount of CIL funds received by year.	Local authority	Mid Sussex District Council monitoring

Policy	Strategic Objectives	Indicator	Target	Implementation	Source
		Guidance.			
<b>DP18: Transport</b>	6	Number of sustainable transport schemes implemented	Annual number	Local authority	Mid Sussex District Council monitoring
<b>DP19: Rights of Way</b>	5, 14	Number of applications resulting a net increase in Rights of Way	Net increase per annum	Local Authority	Mid Sussex District Council/ West Sussex County Council monitoring
<b>DP20: Communication Infrastructure</b>	7,8	Number of applications refused as contrary to this policy but overturned on appeal	Zero	Local Authority	Mid Sussex District Council monitoring
<b>DP21: Leisure and Cultural Facilities and Activities</b>	14	Number of applications resulting in the loss of a community service (shop, public house, place of worship, etc.)	Minimise	Local Authority	Mid Sussex District Council monitoring
<b>DP22: Community facilities and local Services</b>	12,13	Amount of additional community facilities delivered	Maximise	Local Authority	Mid Sussex District Council monitoring
<b>DP23: Character and Design</b>	2	Number of applications refused as contrary to this policy but overturned on appeal	Zero	Public agencies, Local Authority	Mid Sussex District Council monitoring
<b>DP24: Space Standards</b>	13, 14	Number of applications refused as contrary to this policy but	Zero	Developers, Local Authority	Mid Sussex District Council monitoring

Policy	Strategic Objectives	Indicator	Target	Implementation	Source
		overturned on appeal			
<b>DP25:</b> Accessibility	13	Number of applications refused as contrary to this policy but overturned on appeal	Zero	Developers, Local Authority	Mid Sussex District Council monitoring
<b>DP26:</b> Noise, Air and Light Pollution	2, 3	Number of Air Quality Managements Areas (AQMAs) within the District	Minimise	Highway/ Local Authority	Mid Sussex District Council (Environmental Health) monitoring
<b>DP27:</b> Housing Mix	12, 13	Total mix of all housing permitted annually reflects local housing needs	To reflect housing need	Developers, Local Authority	Mid Sussex District Council monitoring
<b>DP28:</b> Affordable Housing	12, 13	Number of affordable homes completed annually (gross)	Maximise in compliance with DP28: Affordable Housing	Developers, Local Authority, Highway authority, public agencies, utility companies and service providers	Mid Sussex District Council monitoring
<b>DP29:</b> Rural Exception Sites	10, 12, 13	Number of affordable housing dwellings completed on rural exception sites	Maximise in compliance with DP29: Rural Exception Sites	Developers, Registered Providers, Local Authority	Mid Sussex District Council monitoring
<b>DP30:</b> Gypsy and Travellers	11, 12	Number of new additional pitches granted permanent planning permission	Maximise	Local Authority	Mid Sussex District Council Monitoring
<b>DP31:</b> Listed Buildings and	2, 3, 4	Number of listed buildings within	No deterioration	Local Authority	Mid Sussex District Council

Policy	Strategic Objectives	Indicator	Target	Implementation	Source
Other Buildings of Merit		the District			Monitoring
<b>DP32:</b> Conservation Areas	2, 3, 4	Number of Conservation Areas with appraisals and management proposals	Increase	Parish Councils Local Authority	Mid Sussex District Council Monitoring
<b>DP33:</b> Historic Parks and Gardens	3	Number of applications permitted contrary to advice received by West Sussex County Council / Conservation Officer	Zero	Local Authority	Mid Sussex District Council Monitoring
<b>DP34:</b> Archaeological Sites	3	Number of applications permitted contrary to advice received by West Sussex County Council / Conservation Officer	Zero	Local Authority	Mid Sussex District Council Monitoring
<b>DP35:</b> Trees, Woodland and Hedgerows	3, 4, 5	Number of applications refused as contrary to this policy but overturned on appeal	Zero	Developers, Local Authority	Mid Sussex District Council monitoring
<b>DP36:</b> Biodiversity	3, 4	Number of planning applications contrary to advice given by Natural England on biodiversity issues	Zero	Public agencies, Local Authority	Mid Sussex District Council Monitoring
<b>DP37:</b> Green Infrastructure	3, 4	Number of Green Infrastructure Schemes implemented (i.e.	Maximise	Public agencies, Local Authority	Mid Sussex District Council Monitoring

Policy	Strategic Objectives	Indicator	Target	Implementation	Source
		enhance natural green space, enhance provision of accessible routes)			
<b>DP38:</b> Sustainable Design and Construction	1	Installed capacity of renewable energy installations within Mid Sussex	Increase	Developers, Utility providers, Local Authority	Department for Energy & Climate Change
<b>DP39:</b> Renewable Energy Schemes	1	Development of Allowable Solutions	Physical or financial contributions to Allowable Solutions	Developers, Private sector providers, Local Authority	Department for Energy & Climate Change
<b>DP40:</b> Flood Risk and Drainage	1	Number of planning applications approved contrary to advice given by the Environment Agency on flood risk/ flood defence grounds	Zero	Public agencies, Local Authority	Environment Agency
<b>DP41:</b> Water Infrastructure and the Water Environment	1	Number of planning applications approved contrary to advice given by the Environment Agency on water quality issues	Zero	Public agencies, Local Authority	Environment Agency

## District Plan Appendix A: List of evidence base documents

The evidence base for the District Plan includes the following documents:

- A Landscape Character Assessment for Mid Sussex (November 2005)  
[www.midsussex.gov.uk/7838.htm](http://www.midsussex.gov.uk/7838.htm)
- A Revision of the Ancient Woodland Inventory for Mid Sussex District Council (February 2007)

## District Plan Appendix B: Saved Local Plan Policies

### Local Plan policies that will continue to be saved on adoption of the District Plan

The table below sets out which Local Plan policies will continue to be saved after the District Plan is adopted. These policies are set out in the Mid Sussex Local Plan 2004. They are also shown on the Policies map. Those Local Plan policies that are saved will remain in place until they are implemented or until superseded by a subsequent Neighbourhood Plan or an appropriate planning document.

Saved Local Plan Policy	Policy type
<b>Burgess Hill</b>	
BH1 Open Air Market, Cyprus Road	Housing
BH2 The Oaks Centre, Junction Road	Housing
BH3 Station Yard and Car Park Burgess Hill	Mixed Housing
BH6 Land north of Faulkners Way, Burgess Hill	Housing
BH14 Charles Avenue and Victoria Road	Link road
BH15 Cycle Track between Hassocks and Burgess Hill	Leisure route
BH16 Wivelsfield Station	Station parking
BH17 Triangle Leisure centre	Leisure
BH19 Playing fields	Leisure
BH20 Equipped Play area	Leisure
BH24 Community buildings	Leisure
<b>East Grinstead</b>	
EG1 Built Environment	Built Environment
EG2 The Portlands	Conservation
EG5 East Grinstead Lawn Tennis Club	Housing
EG8 Stonequarry Woods	Housing
EG15 Children's Play space	Leisure
EG18 Informal open space	Leisure
EG19 Worth Way and Forest Way	Leisure route
<b>Haywards Heath</b>	
HH7 Open space	Leisure
HH11 Land north of Rookery Farm	Housing

<b>Ardingly</b>	
AR1 Ardingly Rail Depot	Site specific policy
AR3 Ardingly College	Site specific policy
AR4 Ardingly Reservoir	Site specific policy
AR5 South of England Showground	Site specific policy
AR6 Wakehurst Place	Site specific policy
<b>Ashurst Wood</b>	
AW1 Townscape Character Area	Townscape Character Area
AW2 land north of Ivy Dene Lane	Site specific policy
<b>Bolney</b>	
BO2 Bolney Grange	Business
BO3 Bolney Recreation Ground	Leisure
BO4 Aurora Ranch site	Site specific policy
<b>Copthorne</b>	
CO2 Townscape Character Area	Townscape Character Area
CO4 Informal open space	Leisure
<b>Crawley Down</b>	
CD1 Townscape Character Area	Townscape Character Area
<b>Cuckfield</b>	
CU3 Recreation	Leisure
<b>Horsted Keynes</b>	
HK2 Constance Wood – Scout building	Leisure
<b>Keymer and Hassocks</b>	
KH4 Cycle Track between Hassocks and Burgess Hill	Leisure route
KH5 Formal Sport	Leisure
KH6 Butcher Wood and Lag Wood	Leisure
KH7 Footpath link to Whitelands Reservoir	Leisure route
<b>Pease Pottage</b>	
PP1 Hemsley nursery – residential (implemented) and public open space (not implemented)	Housing/ leisure

PP5 Finches Field extension	Leisure
<b>Poynings</b>	
PO1 Public open space	Leisure
<b>Pyecombe</b>	
PY1 Church Lane and A273	Housing
<b>Turners Hill</b>	
TH1 Land at Clock Field	Housing
TH3 Children's play area	Leisure
TH4 Mobile Home Park	Site specific policy
<b>West Hoathly and Sharpthorne</b>	
WHS1 Hoathly Hill	Site specific policy
WHS2 West Hoathly Brickworks	Site specific policy
WHS3 West Hoathly Brickworks	Site specific policy
WHS4 Finche Field	Site specific policy
<b>Rural Areas</b>	
RA2 Rowfant Business centre	Site specific policy

## District Plan Appendix C: Glossary

### Abbreviations

**AONB** Area of Outstanding Natural Beauty  
**BREEAM** Building Research Establishment Environment Assessment Method  
**CIL** Community Infrastructure Levy  
**DPD** Development Plan Document  
**HRA** Habitats Regulations Assessment  
**IDP** Infrastructure Development Plan  
**LDD** Local Development Document  
**LDF** Local Development Framework  
**LDS** Local Development Scheme  
**LEP** Local Economic Partnership  
**LNR** Local Nature Reserve  
**LPA** Local Planning Authority  
**LSP** Local Strategic Partnership  
**MR** Monitoring Report  
**NPPF** National Planning Policy Framework  
**NPPG** National Planning Practice Guidance  
**OAN** Objectively Assessed Need  
**SA** Sustainability Appraisal  
**SAC** Special Area of Conservation  
**SANG** Suitable Alternative Natural Greenspace  
**SAMM** Strategic Access Management and Monitoring  
**SCI** Statement of Community Involvement  
**SEA** Strategic Environmental Assessment  
**SFRA** Strategic Flood Risk Assessment  
**SNCI** Site of Nature Conservation Importance  
**SPA** Special Protection Area  
**SPD** Supplementary Planning Document  
**SSSI** Sites of Special Scientific Interest  
**SuDS** Sustainable Drainage Systems

**Ancient Woodland** – Areas that have had continuous woodland cover since 1600, non-statutory designations.

**Aged or veteran tree** – A tree which, because of its great age, size or condition is of exceptional value for wildlife, in the landscape or culturally.

**Appropriate planning document** – This could be a Development Plan Document, a Supplementary Planning Document, or technical note depending upon the role and objective of the document.

**Area of Outstanding Natural Beauty (High Weald AONB)** – Areas designated to conserve and enhance natural beauty, wildlife and cultural heritage; and to meet the need for quiet enjoyment of the countryside and have regard for the interests of those who live and work within them.

**Biodiversity Opportunity Area** – Areas that identify where the greatest opportunities for habitat creation and restoration lie at a landscape scale; they enable the efficient focusing of resources to where they will have the greatest positive conservation impact, representing a more efficient way of delivering action on the ground.

**Burgess Hill Town-Wide Strategy** – This strategy, prepared by Burgess Hill Town Council, sets out the general principles, visions and objectives for Burgess Hill over the plan period and provides a foundation on which policies addressing strategic development at Burgess Hill are based.

**Commitments** – Sites already in the planning process which have planning permission for residential development or are allocated in a Development Plan Document.

**Community Facilities and Local Services** – Public locations that meet a range of community needs such as providing support services, public information, and space for group activities.

**Community Infrastructure Levy** – A levy allowing local authorities to raise funds from owners or developers of land undertaking new building projects in their area.

**Comparison shopping** - the provision of items not obtained on a frequent basis. These include clothing, footwear, household and recreational goods.

**Convenience shopping** - the provision of everyday essential items including food, drinks, newspapers/magazines and confectionery.

**Development Plan** – As set out in section 38(6) of the Planning and Compulsory Purchase Act, an area's development plan consists of the Development Plan Documents contained within the Local Development Framework.

**Development Plan Documents (DPDs)** – These documents include the District Plan and the Small Scale Housing Allocation Development Plan Document.

**District Plan** – This document is the principal Development Plan Document, setting out the long-term strategic vision for the District, as well as objectives for the area and strategic policies.

**Economic Viability** – The financial feasibility of development.

**Evidence base** – The evidence that any development plan document, in particular the District Plan, is based on. It is made up of the views of stakeholders and background facts about the area.

**Geodiversity** – The range of rocks, minerals, fossils, soils and landforms.

**Green infrastructure** – Green infrastructure is a connected network of multi-functional greenspace, both urban and rural, that delivers a wide range of environmental, social and economic benefits, including promoting ecosystem services and improving quality of life.

**Gypsies and Travellers** – Persons of nomadic habit of life whatever their race or origin, including such persons who on grounds only of their own or their family's or dependants' educational or health needs or old age have ceased to travel temporarily or permanently, but excluding members of an organised group of travelling showpeople or circus people travelling together as such.

**Habitats Regulations Assessment** – An assessment of the potential effects of planning policies on European nature conservation sites.

**Infrastructure** – Includes roads and other transport facilities; flood defences; schools and other educational facilities; medical facilities; sporting and recreational facilities; and open spaces.

**Infrastructure Development Plan** – Identifies infrastructure needed to support new homes and businesses over the Plan period.

**Leisure and Cultural Facilities** – This term refers to a broad range of facilities that are available to and enjoyed by the general public for arts, culture, sport and physical activity services including places of worship, play spaces, open space, sports facilities, cinemas, museums, galleries and performance spaces.

**Local Community** – A generic term, which includes all individuals (including the general public) and organisations external to the District Council. It includes the statutory and other consultees.

**Local Development Document** – The collective term for documents that form part of the Local Development Framework. These documents can either be a Development Plan Document, a Supplementary Planning Document or the Statement of Community Involvement.

**Local Development Framework** – Introduced by the Planning and Compulsory Purchase Act 2004 as the replacement for Local Plans. It is the term used to describe the whole portfolio of planning policy documents (Local Development Documents) setting out the planning strategy and policies for the area. It consists of Development Plan Documents, Supplementary Planning Documents, a Statement of Community Involvement, the Local Development Scheme and the Annual Monitoring Report.

**Local Development Scheme** – This document sets out the timetable for the preparation of the Local Development Documents. It identifies which Development Plan Documents and Supplementary Planning Documents are to be produced and when.

**Local Nature Reserve (LNR)** – Designated by the local authority and managed for either nature conservation or to provide recreational opportunities to communities.

**Local Distinctiveness** – Local distinctiveness is the physical, environmental, economic or social factors that characterise an area (and most likely a combination of all four), as well as how an area interacts with others.

**Localism Act 2011** – The Localism Act contains a new power of competence for local government, new neighbourhood plans and development orders, and a new duty to co-operate to replace Regional Strategies. It was given Royal Assent of 15<sup>th</sup> November 2011.

**Monitoring Report** – Part of the local development framework, the annual monitoring report assesses the implementation of the local development scheme and the extent to which policies in local development documents are being successfully implemented.

**National Park (South Downs National Park)** – Areas designated to conserve and enhance the natural beauty, wildlife and cultural heritage; and to promote opportunities for the understanding and enjoyment of the special qualities of the park.

**Multi-functional** – Where greenspace or rooms are able to perform a range of functions, affording greater social, environmental and economic benefits.

**National Planning Policy Framework 2012 (NPPF)** – Sets out the Government's planning policies for England, and provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflects the needs and priorities of their communities.

**National Planning Practice Guidance 2014 (NPPG)** – A web-based resource containing categorised planning guidance to accompany national planning policy.

**Nature Improvement Areas** – Inter-connected networks of wildlife habitats intended to re-establish thriving wildlife populations and help species respond to the challenges of climate change.

**Neighbourhood Plans** – Neighbourhood plans are a new way for communities to decide the future of the places where they live and work. The Government has introduced the right to do neighbourhood planning through the Localism Bill, which gained Royal Assent on 15<sup>th</sup> November 2011.

**Objectively Assessed Need** - The total amount of housing that would be needed to meet, as a minimum, expected levels of growth in population over the plan period. This level of growth expected should take into account demographics (i.e. birth/death rates and migration) and other signals that could influence future trends in demographics.

**Policies Map** – The adopted Policies Map illustrates all of the policies and proposals in the Development Plan Document and any saved policies that are included in the Local Development Framework.

**Priority habitats and species** – Species and Habitats of Principal Importance included in the England Biodiversity List published by the Secretary of State under section 41 of the Natural Environment and Rural Communities Act 2006.

**Section 106 Agreement** – A binding agreement between the Council and a developer on the occasion of granting a planning permission, regarding matters linked to the proposed development. Used to secure matters necessary to render planning applications acceptable by offsetting the costs of the external effects of development e.g. on local schools, which could not be secured through the imposition of planning conditions.

**Section 278 Agreement** – A binding agreement between the County Council and a developer used to secure necessary highway improvements to make development acceptable in planning terms.

**Sites of Nature Conservation Importance (SNCI)** – Locally important sites of nature conservation adopted by local authorities for planning purposes and identified in the local development plan.

**Sites of Special Scientific Interest (SSSI)** – Areas identified by Natural England as being of special interest for their flora, fauna, or geological or physiographical features.

**Strategic Allocations and/or Strategic Development** – These are allocations for specific or mixed uses of development contained in Development Plan Documents. The policies in the document will identify any specific requirements for individual allocations.

**Special Area of Conservation (SAC)** – Areas given special protection under the European Union's Habitats Directive, which is transposed into UK law by the Habitats and Conservation of Species Regulations 2010.

**Special Protection Area (SPA)** – Areas which have been identified as being of international importance for the breeding, feeding, wintering or the migration of rare and vulnerable species of birds found within European Union countries. They are European designated sites, classified under the Birds Directive.

**Suitable Alternative Natural Greenspace (SANG)** – Green space that is of a quality and type suitable to be used as mitigation for the potential impact of development near the Ashdown Forest Special Protection Area.

**Sustainable Community Strategy** – Community strategies promote the economic, social and environmental well-being of their areas and contribute to the achievement of sustainable development. A

copy of the Mid Sussex Sustainable Community Strategy can be viewed on the Mid Sussex District Council website at: [www.midsussex.gov.uk](http://www.midsussex.gov.uk) , from the Community Service link.

**Stakeholders** – Stakeholders include any person or organisation, local or national, who have a legitimate interest in what happens in our area.

**Strategic Access Management and Monitoring (SAMM)** – a strategy setting out the measures that provide part of the mitigation for new residential development within 7km of the Ashdown Forest SPA. These measures focus on protecting the SPA from new recreational pressures through managing access (visitor) behaviour and monitoring both birds and visitors.

**Strategic Flood Risk Assessment (SFRA)** – An assessment by the District Council to inform the Local Development Framework of fluvial, surface water, groundwater, infrastructure and reservoir flood risks.

**Supplementary Planning Documents** – These documents provide supplementary information to the policies in the Development Plan Documents. They do not form part of the Development Plan and are not subject to independent examination.

**Sustainability** – The creation or maintenance of conditions that fulfil current and future economic, environmental and social requirements.

**Sustainability Appraisal** – Sustainability Appraisal is a tool for appraising policies to ensure that they reflect sustainable development objectives (i.e. social, economic and environmental factors). It is required under the Planning and Compulsory Purchase Act to be carried out on all Development Plan Documents and Supplementary Planning Documents.

**Sustainable Development** – Development that meets the needs of the present without compromising the ability of future generations to meet their own needs. The National Planning Policy Framework places a requirement on local planning authorities to positively seek opportunities to meet the development needs of their area and guide development to sustainable solutions.

**Sustainable Drainage Systems (SuDS)** – These are drainage systems designed to manage surface water and groundwater to sustainably reduce the potential impact of new and existing developments.

**Travelling Showpeople** – Members of a group organised for the purposes of holding fairs, circuses or shows (whether or not travelling together as such). This includes such persons who on the grounds of their own or their family's or dependants' more localised pattern of trading, educational or health needs or old age have ceased to travel temporarily or permanently, but excludes Gypsies and Travellers as defined above.
