COVID-19 News

Covid is now endemic and we are working to live with it. Covid rates in West Sussex and across the UK have started to go up again. The West Sussex rate now averages about 60 cases per 100,000 which is still historically low.

People are advised to remain cautious in busy indoor areas where ventilation is important. Mask wearing in busy indoor settings is also still advised (and now mandatory again in all NHS settings) together with regular handwashing.

The number of people in hospital positive for Covid in the UK is now above 7,000 again. Deaths within 28 days of a positive Covid test are steady and now average about 50 cases per day in the UK.

Those with Covid symptoms are asked to self-isolate until those symptoms have passed to safeguard others. Lateral Flow tests will indicate when you are most infectious with Covid.

The best way to avoid serious illness from a Covid infection is to maintain the benefits of vaccination. Everyone aged 5 and over is eligible for a Covid vaccination. A fresh round of booster vaccinations has now started for all those aged 50 years plus. Older more vulnerable groups have been contacted first but all of those eligible will be contacted in due course. These booster vaccinations are now being done at Clair Hall and across West Sussex. At some places a walk in service is available. Flu vaccinations are also underway.

In West Sussex about 6% of the population aged 12 and over remain without any Covid vaccinations and those people continue to be encouraged to come forward to get their first vaccination.

Being fully vaccinated makes overseas travel more straightforward and reduces the need for privately sourced Covid tests as part of some overseas travel requirements.
